According to the routine publication schedule, Journal 41 should have reported the proceedings of the spring 2007 seminar. However, there was no spring seminar in 2007, the Committee opting instead for a field visit to the recently opened National Cold War Exhibition at the RAF Museum's Cosford site. While this was interesting, it did not produce any material for the Journal. Rather than skip an edition it was decided to recycle some notable papers from early publications that were no longer available from stock. They were:

20 October 1986. THE INTELLIGENCE WAR AND THE ROYAL AIR FORCE by Prof R V Jones
