

Truck-Mount VMS

Full-Size Matrix Signs for Large Trucks

More LEDs, 90-degree power-tilt, up to 8 feet wide and still the most energy efficient sign available

- Full-matrix display shows text, graphics or both
- Two sign sizes—4×8 and 4×6
- Touchscreen controller
- Multiple fonts and preprogrammed graphics
- Preprogrammed extra-bold arrows

Wanco's Large-Truck Message Signs feature a higher density of LEDs for superior performance and outstanding legibility.

These signs feature large pixels with four LEDs per pixel, and greater pixel height for multi-line messages with large fonts. Two sizes are available—4×8 feet and 4×6½ feet. Their full-matrix displays can present messages as text, graphics or a combination of both. Easily select from 12 installed fonts.

Common applications include road striping convoys, pothole repairs, snow removal, road sweeping and crash cushion (TMA) trucks.

For ease of use, Wanco's full-color touchscreen controller is redesigned for truck-mount applications, with most common functions available directly from the home screen. The controller is installed inside the cab for easy access.

An integrated 90-degree tilt-frame raises and lowers the sign using dual electric actuators, operated using the touchscreen controller. The touchscreen display indicates the sign position—up, down or in motion. An optional truck-bed mounting frame raises the sign 52 inches off the bed.
