PCBM Barrier Reflector

High Impact Barrier Mount Delineators

— Made in the USA —

PCBM-12
(AR)

Pexco's Davidson PCBM Barrier Reflectors Meet Specifications Worldwide

Unbeatable Impact Resistance!

Why continue to install inferior barrier reflectors that shatter when you only need to install a PCBM once? Pexco's Portable Concrete Barrier Markers (PCBM) were created to increase the visibility of both temporary and permanent concrete barriers.

Injection molded reflectors shatter when struck, losing all of their reflectivity and brightness. PCBMs are virtually shatter proof and simply outshine the competition. They are made of high impact engineering grade thermoplastics allowing our PCBMs to bend upon impact and rebound to their original shape. PCBMs resist both direct and indirect vehicle impacts, even in the coldest weather. Once installed, PCBMs keep working day after day and year after year.

Amazing Reflectivity

PCBMs utilize highly efficient cube corner micro-prismatic sheeting which allows them to exceed both federal and state specifications. The clear and bright reflectivity of the PCBM provides the motorist with extra response time at night,

Separation of opposing traffic on dangerous curves

in the rain, fog, sleet or snow. This is especially important for older drivers. By adding a few seconds to a driver's response time, it increases safety on our highways.

Protect your Investment and Help Save Lives!

Protect the driving public and your investment in bridges and barrier walls. Statistics show that 50% of all fatal accidents occur at night. On rainy nights pavement markings and barrier walls can become practically invisible. Adding bright delineation on these walls reduces accidents and prevents injuries.

When conditions are at their worst, Pexco's PCBMs are at their best!

Typical Applications of PCBMs

- Delineation of temporary concrete barrier walls
- Delineation of permanent concrete barrier walls
- Delineation of concrete bridge parapets
- Delineation on top of wooden guardrail posts

Benefits of using PCBMs

- Help to protect your investment
- The New "Gator Jaw" hinge is used on many of Pexco's PCBMs
- Available in a variety of styles
- Pre-drilled holes & specially formulated adhesive make installation quick & highly durable
- High reflectivity saves lives in bad weather and poor visibility

Reflective Sheeting Options for Pexco's PCBMs

- **AR 1000** - super high intensity prismatic retro-reflective sheeting
- **Diamond Grade** - a full cube retro-reflective sheeting
- **High Intensity** - encapsulated lens sheeting
