Mimi & Poppy's Place

Semmes, Alabama

Our Story:

As an infant, our granddaughter suffered from severe eczema. In 2013, after research, a few trial and errors, and some adjustments to our recipe, the very first bar was born - the oatmeal and honey bar (Haulin' Oats).

We shared our soap with friends and family and eventually, it grew with us making additional scented soaps. Our soaps and other products can be found in several locations in Alabama and Mississippi, plus online. Scan any of the QR codes below for all store locations plus event locations and dates.

OUR *Growing* HOMESTEAD

PEEP, BAA, MOO, AND OINK — SPRING'S GOT A WHOLE NEW CREW!

Hello Friends!

April was a productive month here at the farm — and we've got some sweet spring updates to share!

Cornish Cross Update

Our meat birds have been processed and are now safely in the freezer. It's a great feeling knowing we're stocked up for the months ahead!

Lambing Season Success

Lambing is complete! Our 17 ewes brought 28 healthy lambs into the world — over half had twins, and we barely had to lift a finger. We finished with a perfect split: 14 ram lambs and 14 ewe lambs.

Sir Loin of Semmes: Growing Up Fast

Our bottle calf, Sir Loin, is officially weaned! Mimi has (reluctantly) accepted that he's all grown up and ready to be a big cow now — no more bottles!

New Chicks on the Block

We hatched a dozen new chicks from our own chicken yard to replace some of our older layers. They're thriving and already running the coop like they own the place.

And Then There Were Piglets!

We welcomed 7 new piglets to the farm this month! They're snuggly, squealy, and already keeping us on our toes — and we couldn't be happier.

Thank you for being part of our farm journey — your support means the world to us. We're looking forward to a busy, bountiful May!

With love,
Mimi & Poppy

SPOTLIGHT ON LOCAL: BLUE SKY FARM

Tucked away in the Tanner Williams community, Blue Sky Farm is a labor of love brought to life by husband-and-wife team Matthew and Sarah Tanner. Their journey into farming began 11 years ago when they volunteered through WWOOF (Worldwide Opportunities on Organic Farms), traveling and working across the country. It didn't take long for them to realize that farming was more than just rewarding work—it was their calling.

In 2023, they broke ground on land that once served as a hay field for Matthew's family's dairy farm. That land is now home to Blue Sky Farm, where they grow a variety of vegetables, fruits, and flowers using organic, regenerative methods. No herbicides, no nonorganic pesticides—just honest farming with a deep respect for the land.

Ever wonder where the name came from? It was inspired by Sarah's frequent remarks while walking the fields: "Look at that big, beautiful sky." And just like that, Blue Sky Farm was born—named after the open skies that stretch over their crops and dreams.

Their mission is simple but powerful: provide their community with healthy, chemical-free food while caring for the earth. Everything is grown with intention and heart, right down to the minimal tilling and commitment to soil health.
