Fully upholstered

23" overall depth

Removable high-density foam
sinuous spring seat.

BOOTHS

Traditional Style Booths

Cali (left)

- Inside back angle creates a streamlined, elegant appearance and a more comfortable resting position
- Ideal for situations where guests will be seated for longer periods

Marquis (right)

- Inside back combines with higher crown on the seat to encourage a more forward-sitting position.
- Perfect for touch down spaces.

BOOTHS

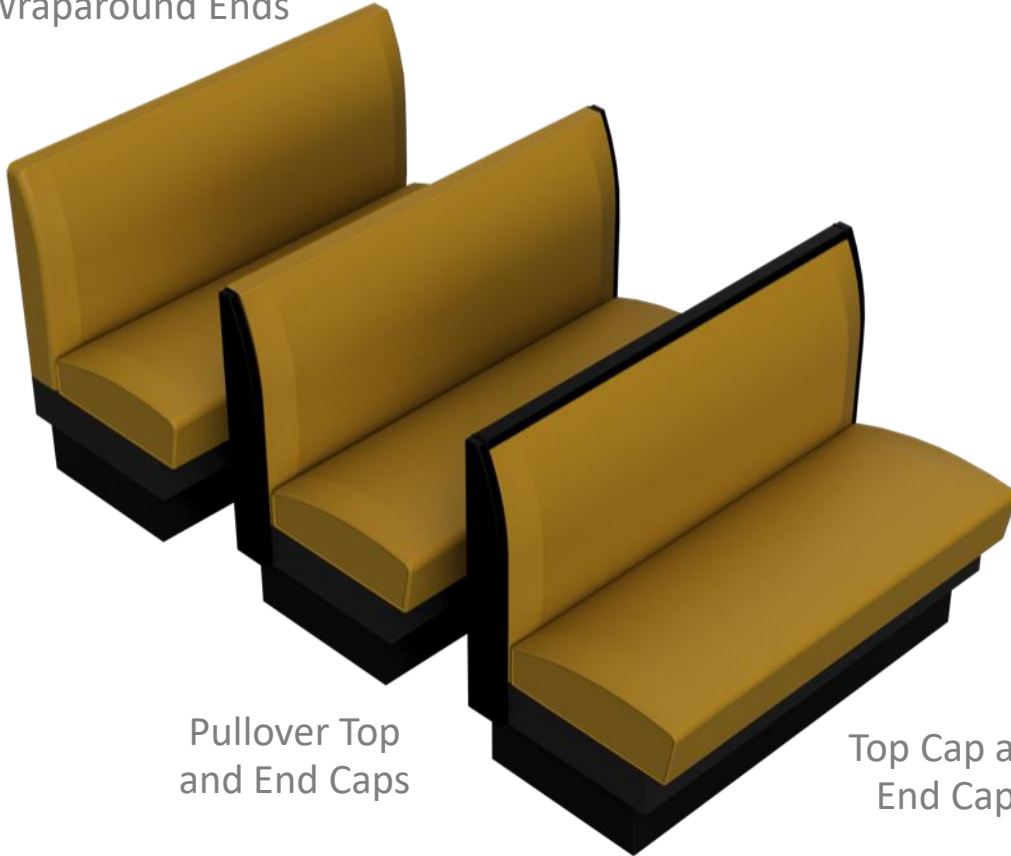

End & Top Options

Choose the option that best fits your design vision.

Pullover top and wraparound ends creates the most furniture-like appearance

End and top caps provide added durability.

BOOTHS

Welt & Stitch Options

Welt provides structural strength to the seams and can be created in a material that matches or contrasts with the seat material

Top and Baseball Stitches are known for their aesthetic appeal and can be sewn with a thread that matches or contrasts with the seat fabric.

BOOTH CONSTRUCTION

BOOTHS

What's In Your Booth?

Common booth complaints:

- Back Rocking
- Squeaking
- Seating that bottoms out/uneven cushions

The Berco Quality Difference

- Frame Integrity
- Springs & Spring Clips
- Decking
- Industry-leading 12-year warranty.

BOOTHS

What's In Your Booth?

Single Piece End Frame
Construction

- Can't separate
- Prevents back rocking

*Industry standard: 2 pieces glued
together, which separate over
time with use*

BOOTHS

What's In Your Booth?

(13) 8 ½ Gauge Seat Springs

- Double springs on both ends
- Less bounce getting in and out of booth
- Heavy-duty springs hold more weight, extending booth life

Industry Standard: (10) 9 ½ gauge springs

BOOTHS

What's In Your Booth?

Teflon Spring Clips

- Eliminate Squeaking

Industry Standard: none

BOOTHS

What's In Your Booth?

Flex Insulator

- Wire-reinforced flex insulator
- Keeps springs from twisting
- Redistributes weight across the booth for longer life

Industry Standard: no wire

BOOTHS

What's In Your Booth?

Fiber Decking

- 3/8" Ragabond
- Prevents spring from being seen from the surface of the booth

Industry Standard: no decking, springs visible to user

BOOTHS

What's In Your Booth?

High Slip Polyethelene

- Protects both foam and vinyl from wear as customers slide in and out of booth

Industry Standard: none

BOOTHS

Comfort Connection

Proprietary design eliminates the uncomfortable split between sections

Standard on wall benches and circle booths.
