THE FUTURE ISN'T COMING IT'S ALREADY HERE.

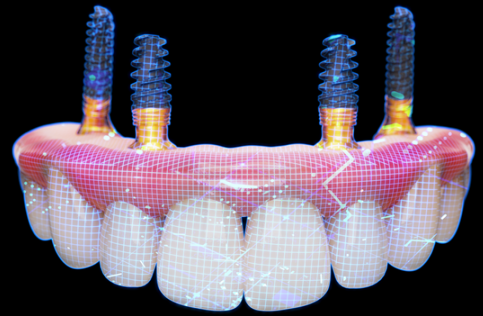

DIGITAL DENTISTRY ISN'T THE FUTURE — IT'S THE STANDARD.

Dentistry has officially crossed the threshold.

Practices that haven't adopted digital workflows aren't falling behind — they're already behind. From diagnostics to guided surgery, scanning, and 3D fabrication — your peers are doing it. **Right now.**

WHY NOW?

- Enhance patient experience & trust
- Increase case acceptance via visual workflows
- Reduce chair time, improve clinical efficiency
- Unlock access to same-day workflows
- Future-proof your practice as new technologies integrate faster than ever

DID YOU KNOW? — IRS SECTION 179

You can write off the full purchase price of qualifying dental equipment
THIS year.

- Deduct up to \$1,220,000 for 2025 under IRS Section 179
- Applies to equipment placed in service by December 31, 2025
- Covers hardware like: 3D printers, scanners, surgical systems, milling units, and more

**Check with your CPA to confirm eligibility.*

Digital dentistry isn't optional — it's inevitable.
The good news? **It's never been easier to get started**

NEED HELP NAVIGATING YOUR DIGITAL UPGRADE?

Connect with the experts at the event to find out what's possible — and what qualifies.
