MET Connections is a utilities solutions provider, specialising in the Telecommunications Sector. MET offers a complete outsourcing solution to clients who are looking to scale their networks build. Focused on providing End-to-End, high-quality engineering solutions and delivery in a fast-paced industry, MET is helping build and maintain the UK's fibre network. This includes design, programme management, network build, civils, and home install.

OUR VALUES

Our values are represented in everything we do.

We operate as a **customer-first contractor**, with a **partnership** based approach. Our **flexibility** and desire to **adapt** allows us to meet varying customer requirements.

We ensure **engineering excellence** and a **Right First Time** outlook by employing **highly-experienced** and **vett**ed engineers who we provide with the training and equipment to supplement their expertise. MET **heavily invests** into systems and tools to enhance our back-office.

Our Commercials are **industry-leading** thanks to our strong **programme management** and **data capabilities**, allowing our clients to scale further. This allows MET to **invest back** into our team by paying fairly which is of critical importance to us as a business.

Caring for and **developing** our people is a key priority for us. We **upskill** our team by providing **structured training** and one-on-one **coaching** sessions. Excellence is integral to our business, from our engineers to our operational teams.

OUR MDU SERVICES

Our comprehensive range of services includes a highly efficient turnkey MDU offering, allowing networks to be brought into UK homes

OUR CUSTOMERS

We partner with Internet Service Providers, Managing Agents, Local Councils, and Contractors to deliver high-quality services. Our experienced team and competitive pricing enable us to assist them in expanding the UK's network, repairing infrastructure, and connecting homes.

TESTIMONIALS

G.Network 100% FIBRE CONNECTIVITY

MET Connections partnered with G.Network to upgrade their infrastructure, enabling faster and more cost-effective home installations. Through comprehensive surveys, precise costings, material procurement, and quality testing, G.Network achieved significantly reduced installation lead times and was recognised as the 'Best Urban Full Fibre Provider' at the 2024 UK Full Fibre Awards.

“G.Network have a valued partnership with MET Connections that continues to grow. They understand our business and are collaborative, responsive and safety-focussed in their approach. The service we receive is competitive and good value for money. The team at MET have clearly shown that they have the expertise and understanding of what it takes to build a Full Fibre network in London.”

Kevin Murphy - G.Network CEO

Whole building connected

“We had the whole building connected. The whole process was spotless with MET Connections firstly laying the cables in place connecting all flats via cable conduits that were put in place by our own builders. MET Connections were really helpful and did everything they could to meet our needs. Finally I had my flat connected by Marriot who was very polite, efficient and helpful. Now I am up and running. Big thank you to all involved.”

MET connections

“Good morning, Yesterday a young guy, Lewis Brighman and Dan George, representing your company (MET connections) visited my small block and installed connections so that, should we wish to use G Tec in future our flats would be ready. I just wanted to let you know that Lewis was polite and professional and happy to answer any questions I had. Companies could do well to employ more people of his calibre, taking full responsibility for the quality of his work and importantly recognising he's working in people's home. Best Regards, Ian Little”

CLUTTONS

MET Connections take great pride in what they do. They are experts in fibre from survey through to build and develop an excellent rapport with clients and end consumers throughout the process. Their surveys and build process are of high standard which as a result strengthens the relationships with key accounts.
