Adult CPR and AED Skills Testing Checklist

Student Name _____ Date of Test Scenario: "You arrive on the scene for a suspected cardiac arrest. No bystander CPR has been provided. You approach the scene and ensure that it is safe. Demonstrate what you would do next." Assessment and Activation ☐ Checks responsiveness ☐ Shouts for help/Sends someone to phone 9-1-1 and get an AED ☐ Checks breathing Once student shouts for help, instructor says, "Here's the barrier device. I am going to phone 9-1-1 and get the AED." Cycle 1 of CPR (30:2) *CPR feedback devices preferred for accuracy **Adult Breaths Adult Compressions** ☐ Performs high-quality compressions*: ☐ Gives 2 breaths with a barrier device: Hand placement on lower half of breastbone • Each breath given over 1 second • 30 compressions in no less than 15 and no more · Visible chest rise with each breath than 18 seconds · Gives 2 breaths in less than 10 seconds Compresses at least 2 inches (5 cm) Complete recoil after each compression Cycle 2 of CPR (repeats steps in Cycle 1) Only check box if step is successfully performed ☐ Gives 30 high-quality compressions ☐ Gives 2 effective breaths Instructor says, "Here is the AED." **AED** (follows prompts of AED) ☐ Powers on AED ☐ Correctly attaches pads ☐ Clears for analysis ☐ Clears to safely deliver a shock ☐ Presses button to deliver shock ☐ Student immediately resumes compressions AED trainer says, "The shock has been delivered." Cycle 3 of CPR (repeats steps in Cycle 1) Only check box if step is successfully performed ☐ Gives 30 high-quality compressions ☐ Gives 2 effective breaths STOP TEST Instructor Notes Place a ✓ in the box next to each step the student completes successfully. • If the student does not complete all steps successfully (as indicated by at least 1 blank check box), the student must receive remediation. Make a note here of which skills require remediation (refer to Instructor Manual for information about remediation). **Test Results** Check **PASS** or **NR** to indicate pass or needs remediation: **PASS** NR

Adult CPR and AED Skills Testing Critical Skills Descriptors

- 1. Assesses victim and activates emergency response system (this *must* precede starting compressions) within a maximum of 30 seconds. After determining that the scene is safe:
 - Checks for responsiveness by tapping and shouting
 - Shouts for help/directs someone to phone 9-1-1 and get AED
 - Checks for no breathing or no normal breathing (only gasping)
 - Scans from the head to the chest for a minimum of 5 seconds and no more than 10 seconds

Cycle 1: Performs high-quality chest compressions (initiates compressions immediately after recognition of cardiac arrest)

- Correct hand placement
 - Lower half of the breastbone
 - 2-handed (second hand on top of the first)
- Compression rate of 100 to 120/min
 - Delivers 30 compressions in 15 to 18 seconds
- Compression depth and recoil—at least 2 inches (5 cm)
 - Use of a commercial feedback device/manikin is highly recommended
 - Complete chest recoil after each compression

3. Cycle 1: Provides 2 breaths by using a barrier device

- Opens airway adequately
 - Uses a head tilt-chin lift maneuver
- · Delivers each breath over 1 second
- Delivers breaths that produce visible chest rise
- Avoids excessive ventilation
- Resumes chest compressions in less than 10 seconds

4. Cycle 2: Performs same steps for compressions and breaths as in Cycle 1

5. AED use

- Powers on AED
 - Turns AED on by pushing button or lifting lid as soon as it arrives
- Correctly attaches pads
 - Places proper-sized pads for victim's age in correct location
- Clears for analysis
 - Clears rescuers from victim for AED to analyze rhythm (pushes analyze button if required by device)
 - Verbalizes and visually demonstrates to stay clear of the person
- Clears to safely deliver shock
 - Verbalizes and visually demonstrates to stay clear of the person
- Presses button to deliver a shock
 - Resumes chest compressions immediately after shock delivery
 - Does not turn off AED during CPR
- 6. Cycle 3: Performs same steps for compressions and breaths as in Cycle 1
