

The Digital Rainbow

**Early Years Interactive
Touch Screen Table**

A highly effective ICT investment for any Nursery

Ofsted Early Learning Goals guidance released in 2017, stated that children should have access in schools to a wide range of technologies that they might use at home. Early learners need to explore a wide range of media and materials, and be provided with opportunities and encouraged to share their thoughts and feelings through many activities, including technology. The 40" full HD resolutions Interactive Touchscreen Table allows young children to develop important early learning skills such as: hand eye coordination, reading, writing, speaking, listening, literacy and numeracy, whilst having fun playing with others.

Working along the traditional methods of teaching EYFS, the touch table is an excellent way of introducing technology into the nursery. EYFS content and sensory apps Pre-installed Early Years content and sensory apps are suitable for individual or group activities. This encourages children to socialise, learn, share and communicate, covering all areas of the early learning goals via fun educational content.

The Interactive Learning Table is ideal for all EYFS education and entertainment

Powered by an internal rechargeable battery pack lasting 8 hours on one charge, the table has a built-in Android operating system, enabling access to a rich library of educational software. The touchscreen and gesture control delivers an intuitive, child-friendly interface, allowing children to interact directly with what's happening on screen. Up to 10 simultaneous touches are supported, allowing children to play and learn together. Children can write on the screen using either their finger, or a touch pen. The Digital Rainbow Interactive Table is an interactive and mobile activity board, ideal for delivering interactive learning experiences to Key Stage 1 and Nursery children.

Designed with early years in mind

Built specifically for pre-school children and early years' activities, the Interactive Touchscreen Table comes with 6mm toughened and durable safety glass which can be wiped-clean. With a robust aluminium structure and sleek oak wood finish, the table is designed to withstand intense daily use.

It can be easily manoeuvred from room to room with locking brakes for added safety and security. The tilt able and lockable screen makes using the interactive table more accessible for children.

The table's flexible adjustments allows children to interact together around the table on learning apps, games or puzzles. Alternatively, the table can be tilted further through to 68 degrees before being locked into place to enable children to use it more comfortably whilst sitting to watch videos and cartoons or if they are playing on their own.

Award-winning Yellow Door, the publisher of multi-sensory and education apps, can be pre-installed on the Interactive Touchscreen Table to create a complete early learning solution.

*"Hello I am Clare the founder of The Digital Rainbow and my passion for this fantastic technology has come from **30 years experience as a nursery practitioner**. Please feel free to give me a call as I would love to share my passion and show you this fantastic table"*

clare@thedigitalrainbow.co.uk

We are a family business set up on the principle of a real passion for helping young children develop their early years learning through the use of digital technology working alongside traditional methods. DIGITAL RAINBOW was founded by Clare, a nursery practitioner for almost 30 years. Clare has teamed up with her mother-in-law, Betty, to promote the use of exciting new technologies to assist the development of children in early years education. Betty was awarded an MBE for her services to education having started her career as a primary school teacher. Education has been a strong part of the family for over 60 years and along with Clare's passion for the early years learning, the company is highly focused on assisting nurseries and preschools across the UK embrace this fantastic new technology.

We provide the interactive software solutions including the leading early learning developer Yellow Door. Play is at the heart of everything we do and using multi sensory resources we believe that helping you to offer language-rich play environments is the best thing we can do together to enhance children's learning, their well-being and their future success. Our range includes tactile resources and educational apps for children in the EYFS and those with SEND.

In today's digital age the combination of our Table and Yellow Door Software creates one of the best ICT investments your nursery can make
