HOW CAN I HELP YOU?

I help small business owners to identify gaps and opportunities of an operational problem. I then work with the owner to develop a comprehensive technological solution from strategy to delivery to resolve a small business problem in the retail, wholesale, construction and education sectors.

CONSULTING EXPERTISE

Specializing in retail, wholesale, construction small businesses:

Business applications implementation - accounting, POS, CRM, ordering and inventory management systems.

Operation management - business metrics, subcontract analysis.

Virtual Assistant services - office administration and bookkeeping

PREVIOUS EXPERIENCES

With over 14 years of experience, I can bring a deep understanding of retail, wholesale and construction small business industry and trends, helping small business owners to develop and execute on strategies to solve a business problem or growth through technological solutions. My knowledge of both business application and management has allowed me to provide rounded support that meet your businesses needs.

Prior to starting SMB Tomorrow Consulting Services, I worked through from technical support, consultant, team leader and management positions in many corporations including CA (Computer Associate), Reckon Limited, Ebix and Intuit.

I have also managed a supply chain systems in a small wholesale business and operated a franchise business with several retail outlets in Westfields in my early career.
