

## A+ Stain Remover

**POWERFUL STAIN REMOVER FOR SWIMMING POOLS**

### Powerful Stain Remover – Eliminates the most difficult stains

A+ Stain Remover is a granular product that is an effective and environmentally friendly alternative to remove or reduce pool and spa surface stains resulting from dissolved metals in the water and organic stains from tannins in leaves and other organic debris. This product does not contain any harsh chemicals, is safe for all pool finishes, and may be used with chlorine, bromine and non-halogen sanitizers.

#### BENEFITS

- The ultimate choice for removal of most difficult stains found in pools
- Simple & Effective
- No scrubbing for most stains
- Safe for all pool finishes and is particularly effective on vinyl
- Removes stubborn organic stains
- Biodegradable

#### DIRECTIONS FOR USE

- Pool chlorine level should be below 0.3 ppm before treatment with A+ Stain Remover.
- For severe staining in one or more defined areas of the pool, sprinkle A+ Stain Remover directly over or near the problem area with the circulation system off for approximately 8 hours; then begin normal system operation. For general staining that may occur throughout the pool, sprinkle this product around the pool edge and allow pool pump to circulate pool water thoroughly for 24 hours or more.
- For extremely stubborn stains, brush stained area and retreat with A+ Stain Remover.
- Do not re-chlorinate pool for 36 hours after using A+ Stain Remover

#### DOSAGE

- 2 pounds per 10,000 gallons of pool water for general treatment or as needed for spot treatment.

#### MAINTENANCE

- After treatment with A+ Stain Remover, it is recommended to use Metal-Out Plus or Stain & Scale Control as part of a preventative maintenance program. Follow label directions on those products for maintenance treatment.

**AVAILABILITY:** A+ Stain Remover is available in 2# bottles.
