

SUMMIT LOCKERS

YOUR HOME FOR INNOVATION

WHO WE ARE

Summit was founded on a simple premise that customers need durable lockers and a dependable company to partner with; and we were right.

Since opening our doors in 2011, Summit has tripled our production capacity and shipped to over 2,000 customers in all 50 states! We are dedicated to working with owners, architects, specialty companies, contractors, and installers to ensure that all your locker projects are a success.

SHELVING

SUPERIOR DESIGN

PREMIUM MATERIALS & SUPERIOR DURABILITY

To build a better locker, Summit chose to build our lockers with phenolic panels, mortised joints, and stainless steel fasteners in lieu of butt joints, welds, or pop rivets. Our shelves feature tenons that provide strength to support heavy loads resulting in a stronger, more durable, and rigid locker. These lockers are built with full, overlay doors and hidden ventilation to improve access, appearance, storage capacity, and ventilation.

MORTISED JOINTS

Summit Locker's mortise and tenon joints lock pieces together using stainless steel screws for superior strength and durability.

VENTILATION

Our lockers are designed with ventilation in mind with space around the doors to provide multi-directional ventilation.

OVERLAY DOORS

Our full sized / overlay doors increase the usable size of each locker for optimal usage.

HYGIENIC

Our lockers are composed of non-porous surfaces which make them safe and easy to clean.

WATER RESISTANT

PHENOLIC LOCKERS

WATER RESISTANT & DURABLE

Summit Phenolic lockers combine the appeal of wooden lockers with low maintenance and superior durability. Phenolic lockers are perfect for high traffic, as well as high moisture areas.

ATHLETIC LOCKERS

THE LOOK OF SUCCESS

Our athletic lockers provide a competitive advantage by combining strength, durability, low maintenance, and custom designs for professional, collegiate, and high school teams.

HDPE LOCKERS

DURABLE SOLID PLASTIC

High Density Polyethylene (HDPE) lockers have through-color panels and perform well in high moisture areas. Numerous sizes and styles make these lockers suitable for all facilities.

BENCHES

Summit provides locker room benches in Solid Phenolic, Solid Plastic (HDPE), and hardwood to meet customer's design needs including ADA compliant options. We offer a wide variety of options to mount your benches.

CUBBIES

Summit provides cubbies in all sizes and configurations. From small mail cubbies all the way to equipment storage, we can meet your needs.

GOING GREEN

INNOVATIVE LOCKER ROOM SOLUTIONS

As an environmentally friendly company, our lockers are made from recycled materials in several ranges to qualify for GREENGUARD indoor air quality and LEED certification.

DURABLE & LONG LASTING

Summit Lockers are made in the U.S.A. using environmentally friendly materials. We use modern high-precision equipment to provide consistent and top quality products. Our design and manufacturing capabilities enables us to create a variety of custom products.

SUSTAINABILITY

Summit Lockers addresses sustainability through the production of durable lockers that are manufactured with environmentally aware components. The result is a longer lasting locker that uses less natural resources.
