GALVANITE™ Corrosion Resistant Sheet Steel prevents rust and corrosion

IDEAL FOR USE IN HIGH HUMIDITY AREAS, OUTDOOR LOCATIONS, NEAR SHOWER, POOL AREAS AND FOOD INDUSTRY FACILITIES

GALVANITE™, is AMP's trade marked name for lockers and cabinets manufactured with galvaneal sheet steel components and finished with an electrostatically applied high-grade powder coat finish. Galvanite and powder coat

offer exceptional double protection against corrosion, even under the most adverse conditions. Tests indicate that galvaneal increases the estimated lifecycle threefold.

GALVANITE™ COLD ROLLED SHEET STEEL

with our powder coat finish after a 336 hour salt spray test.

COMMON COLD ROLLED SHEET STEEL

with a 1 mil dry film build paint thickness after a 336 hour salt spray test.

WHAT IS GALVANNEAL?

Galvaneal is the result of the combined processes of galvanizing (hot-dipped zinc coating) and annealing (heat treatment). Galvaneal does not flake off its galvanized coating when formed, stamped, and bent.

The very fine matte finish acts like a primer that easily adheres to paint. These characteristics make galvanealed sheet steel ideal for steel lockers in high humidity, corrosion prone areas.
