

Village of Malvern Phase 2 Waterline Project

Secured Funding • Stronger Infrastructure • Reliable Water

The Village of Malvern is pleased to announce that funding has been secured for the **Phase 2 Waterline Project**, an important infrastructure improvement that will address identified needs within the Village's public water distribution system.

The project is being undertaken as part of the Village of Malvern's continued efforts to improve the reliability, operation, and long-term sustainability of its public water system and to address deficiencies identified within the system.

Project Purpose

The Phase 2 Waterline Project will include improvements to the Village's existing water distribution system. The project is intended to improve the Village's ability to operate, maintain, and isolate portions of the water system when necessary for routine maintenance, repairs, or emergency situations. A significant objective of the project is to address water system conditions that have previously limited the Village's ability to properly access and exercise certain water system valves. Upon completion, the improvements are expected to provide the Village with greater operational control of its water distribution system and improve its ability to respond to future waterline maintenance and emergency situations.

Secured Grant Funding

The Village of Malvern has secured grant funding to assist with the cost of the Phase 2 Waterline Project. The Village is committed to using available grant and local resources responsibly to address critical infrastructure needs while minimizing the financial impact on local residents and water customers. Secured grant funding totaled **\$4,143,800** including the following sources:

- ARC **\$400,000**
- OPWC **\$499,999**
- Army Corps **\$900,000**
- EPA WSRLA **\$10,600** for lead line replacement
- EPA WSRLA **\$2,333,201** Principal Forgiveness for construction

Upcoming Construction

Construction for the Phase 2 Waterline Project is anticipated to begin following completion of the necessary pre-construction requirements. Residents and businesses located within or near the project area may experience temporary impacts during construction, which may include:

- Temporary traffic restrictions or lane closures
- Construction equipment and activity within the project area
- Temporary interruptions to water service when necessary to complete connections or system work
- Temporary changes to access to properties
- Construction-related noise, dust, and other temporary inconveniences

The Village will make reasonable efforts to provide advance notice of any planned water service interruptions and other significant impacts associated with construction.

Public Health and Water System Improvements

The Phase 2 Waterline Project is intended to strengthen the Village's public water infrastructure and improve the Village's ability to properly operate and maintain its distribution system. The Village recognizes the importance of maintaining a safe and reliable public water system and considers this project an important investment in the future of the community.

Public Notification

This release is being provided to inform residents, businesses, water customers, and other interested members of the public that the Village of Malvern has secured funding and is moving forward with the **Phase 2 Waterline Project**. Additional information regarding construction schedules, affected areas, temporary water service interruptions, traffic impacts, and other project-related matters will be provided by the Village as information becomes available.
