

PENETRANT PLANTS
LIQUID PENETRANT INSPECTION PLANTS

Baugh & Weedon are a leading UK manufacturer and supplier of NDT equipment specialising in MPI Benches and Penetrant Process Lines.

Penetrant Inspection is an important and established NDT method for the detection of surface breaking defects in non-ferrous components.

Baugh & Weedon offers bespoke Penetrant Lines that are designed and manufactured to your application needs and fit your layout requirements including the traditional configurations such as Straight Line, Parallel Straight lines, "U" and "L" formats.

We can provide all or part of the complete process line including:

- Penetrant Tanks
- Wash Stations
- Drying Ovens - Front loading and top opening
- Dust Storm Cabinets - Front loading and top opening
- Viewing Booths - with UV and/or white light sources.
- All associated accessories such as hand held inspection lamps, overhead UV lights.

Designed and manufactured in the UK, the Baugh & Weedon Penetrant Plants are built using high quality Stainless Steel.

Our dedicated team has years of experience in designing, building and installing Penetrant Lines of all sizes and upholding our renowned reputation for manufacturing quality products, built for longevity, in even the harshest industrial environments.
