

Our Goal with the NPEC Futurity, is to market and promote the stallions of NPEC, to give the breeders an opportunity to breed for something that will give back to them. Most of all for people to get together and have fun with some good clean competition. Also, this is an opportunity for mare owners that have faith in what their mare can produce, to showcase their breeding program.

We are looking forward to our first ever NPEC futurity. This will be a fun competitive event, and should be very educational. We have had this vision to show multiple breeds together for a while and this is a prime opportunity to showcase quality no matter what breed of horse we have and promote. Many people ask us what our preferred breed of horse is and our answer is always, that a good quality horse is our preferred breed.

As a breeder it is always good to be rewarded for breeding a good quality foal, and that is what this is all about. We hope to see you at the event. *- New Paris Equine Center*
