Home and Corona

House or houses in the Holy Quran

Allah mentioned the house is a place to rest, so he said Sura Al-Nahl:

- Verse (80)

(And Allah has made for you from your homes a place of rest and made for you from the hides of the animals tents which you find light on your day of travel and your day of encampment; and from their wool, fur and hair is furnishing and enjoyment for a time.)

Glory to God Almighty, He made you from your homes a comfort and stability with your family, in these critical days and the crisis in which our beloved country passes through the outbreak of the Corona virus epidemic and there is no doubt about precautionary matters and following the instructions is to stay in housing with your family for two weeks and can extend for more in order to avoid From mixing with others and beware of the Corona virus, which is a challenge and insistence we have in overcoming this virus, which has become the first world countries how to eliminate it.

And my article on housing and raising the topic now, but it raises my interests in that housing or the space in which we live is of great importance to most of those interested in coexistence and adapting to an environment in which man was forced to stay for a period of time that may go on and develop and appear to him reflections and behaviors that are not good in circumstances that necessitated He has to share with other children or the parents who are with him, to live together in one place they did not plan for him in advance and ask and think about what happened, we did not meet for a long time with each other, and now we are in the morning and evening we did not leave each other, and the father begins to know the behavior of the children closely and begins Children are close to parents and there will be sharing Home and internal cooperation, and all of that is that the design of the dwelling began to become somewhat clear to the users of the dwelling because the stay in it has long and its importance seemed to emerge by moving between the bedrooms and living rooms and the kitchen to prepare and use the time, because before the Corona virus epidemic they did not enjoy and did not take advantage of the joints of the dwelling and its spaces but rather most of the time outside the dwelling Or home.

When you care with the details of designing the house, reviewing it, creating a moving perspective and simulating spaces, you will find pleasure and enjoyment when you move between the rooms of the house and other voids and extend your imagination and sail between the corridors of the residence you will wake up to the reality you lived in your imagination and chose the designer who achieved your perception and translated it into reality.

I hope we can coexist and create comfort and tranquility in our housing, it is a crisis and It's going to be over.

God protects you

Greetings to you and good housing
