

USED 2019 PILLAR

**HPLD
HORIZONTAL
POSITION LOCK
DOWEL**

The HPLD is a horizontal point to point Lockdowel inserting machine and one of the finest line boring machines for cabinets available. This machine will insert H-clips, Channel Locks and Spring Pins with ease. Using CNC control, this machine positions the drilling spindle to bore holes and insert the Lockdowel hardware.

TOUCHSCREEN INTERFACE A 15" industrial color touchscreen is used to interface between the operator and the machines computer to write and store programs.

The machine frame is constructed of an all welded 1/4" tubular steel frame for rigidity and accuracy.

The machine features a pop-up mid fence that can be pneumatically raised to convert the machine from two to four zones allowing for maximum through put of narrow product.

This inserter can insert the Channel Lock 20 mm Barbed post. The inserter is on the CNC carriage and follows the drill through its operation and inserts the Lock Dowel into the holes.
