

This newsletter includes a curated collection of top stories from www.CHP-Funder.com, [World Cogeneration Day](#), and the global media, showcasing the latest in Combined Heat and Power (CHP) innovation and the investors that fund cogeneration. Please get in [touch](#) if you'd like to be a guest contributor, or if you have any feedback or tips.

Northern summertime is here, and we have seen thunderstorms, rising gas and energy bills. It is important to share news about the opportunities for CHP's resiliency and energy efficiency to reduce energy waste, to raise awareness in our communities and recognize the importance of CHP and our people. You can start sharing news about resilient and energy efficient CHP by checking out our fun, easy [World Cogeneration Day](#) celebrations.

Join us for World Cogeneration Day on **September 4, 2021**, by getting involved online today. *The theme for this year is "Resiliency in Cogeneration"*. We want to include you, so send us your stories about CHP's [#resilience](#) and [#reliability](#). Tell us about the benefits of [#cogeneration](#), and how CHP provides [#sustainability](#) in the 21st century. See <https://linktr.ee/worldcogenerationday> for details.

HELP OUR CAUSE

If you haven't already done so, please consider making a contribution at www.WorldCogenerationDay.org. Your support as a sponsor or partner will enable us to put your company on the [World Cogeneration Day](#) website, broaden outreach, and recognize CHP heroes! Your generous donation in any amount will fund the mission for World Cogeneration Day celebrations. [#WorldCogenerationDay](#)

Low-carbon hydrogen is not cheap and needs support, says major energy organization

<https://www.cnbc.com/2021/07/28/low-carbon-hydrogen-not-cheap-needs-support-says-energy-organization.html>

Japan's 'hydrogen economy' to power the Tokyo Olympic Games (EuroNews)

When the final torch bearer lights the Olympic cauldron in the Japan National Stadium on July 23, it will mark not only the start of the Games, but a new chapter in the country's drive towards a sustainable future. For the first time in the history of the Games, hydrogen is fueling both the Olympic and Paralympic Cauldrons in Tokyo and the Olympic Torch during part of its journey through Japan. Electricity used to create the hydrogen comes from a solar array located in the Fukushima prefecture.

Bipartisan \$1T Senate infrastructure bill focuses on nuclear, carbon capture, transmission... and green H2

"While there is much to celebrate in this product of our bipartisan efforts, more work still needs to be done," Sen. Tom Carper, D-Del., who leads the Senate Committee on Environment and Public Works, said Monday.
