

Remote Learning: Making It Work

The Magic Of The Classroom

- Kid friendly.
- Child centered.
- Developmentally appropriate.
- Growth Mindset Model.

Create A Learning Space

- Separate work from play.
- Have all learning tools available.
- Let time with the teacher be time with the teacher.
- Encourage your child to ask the teacher questions.
- Hand in your child's work, even if it is wrong.
- Recognize best effort and speak to learning from your mistakes.

Create Routines

- Write out and post a time schedule each day.
- Include brain breaks and movement breaks.
- Turn off electronics and encourage fine motor activities.
- Read....read....read...read, together and independently.

Look for success everyday.

- Start small.
- Speak to where you want to be and how you plan to get there.
- Remember, growth is sneaky. Most often, change is taking place and we don't even see it! Be patient!
- Remind yourself, you are doing a great job!
- See the finish line and keep going.
