

# BROWN SPECLED PEA

## GROWING GUIDE:

### STEP #1

Spread seeds evenly onto a tray and soak in cool water for 8-12 hours.

### STEP #2

Drain the soak water and rinse thoroughly.

### STEP #3

Get your growing tray and fill it 3/4 with potting soil. Tamp down the soil surface to make it as smooth as possible.

Next, evenly distribute the pea seeds over the soil's surface and sprinkle them with water.

### STEP #4

After planting, cover the tray with cardboard or another tray to start the seed growing process.

### STEP #5

Check and water your soil every day.

### STEP #6

On day 4. Move your tray to a well-lit location

### STEP #7

Continue to mist sprouts every day

### STEP #8

Harvest your microgreens on day 7 when the leaves are open and green!
