

## NCAM COVID-19 Risk Assessment

	Level of Risk
How many people does the employee carrying out that work comes into contact with? (Very few = lower risk; many = higher risk)	Higher Risk
How easy will it be to identify the people with whom the employee comes into contact? (Easy to identify, such as co-workers = lower risk; difficult to identify, such as unknown members of public = higher risk)	Lower Risk
How close is the employee carrying out the tasks in proximity to other people? (2 meters or more in an outdoor space = lower risk; close physical contact in an indoor environment = higher risk)	Higher Risk
How long does the work require the employee to be in that proximity to other people? (Brief contact = lower risk; lengthy contact = higher risk)	Higher Risk
Does the work involve regular interaction with people considered at higher risk of severe illness from COVID-19, such as people with underlying health conditions? (Little to none = lower risk, Lengthy contact = higher risk)	Medium Risk
What is the risk of COVID-19 infection and transmission in the work environment when compared to the risk outside work? (Equal to outside work = lower risk; higher than outside work = higher risk)	Higher Risk
Will the work continue to involve regular interaction with unknown people if the region is at a higher alert level? (no = lower risk; yes = higher risk).	Lower Risk
