

# DISINFECTION SERVICE

Tools & Bubbles

# KERALA'S PREFERRED

**Tools & Bubbles**, founded in Kochi, by providing international standard services to “God’s own Country” with a short period it is grown as Kerala’s preferred service partner for corporate offices, commercial organizations and respected family’s

# WHY WE SHOULD DISINFECT THE SURFACES ??

Like other coronaviruses, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) is an enveloped virus with an outer lipid envelope, which makes it more susceptible to disinfectants compared to nonenveloped viruses such as rotavirus, norovirus, and poliovirus.

The virus that causes COVID-19 is transmitted mainly through close contact and respiratory droplets, with possible airborne transmission in premises where procedures that can generate aerosol are performed.

Fomites and contaminated surfaces have conclusively linked to transmission of SARS-CoV-2, demonstration of surface contamination in healthcare premises and experiences with surface contamination linked to subsequent infection transmission in other coronaviruses, have informed the development of cleaning and disinfection recommendations to mitigate the potential of fomite transmission of SARS-CoV-2 in healthcare and non-healthcare premises.

# OUR DISINFECTION SERVICE

In addition to direct human-to-human transmission, contaminated surfaces also pose a risk of transmitting viruses and pathogens.

Especially in the current COVID-19 pandemic, this is of great importance: Studies show that SARS-CoV-2 viruses can survive for several days on surfaces that we come into daily contact with.

The Tools & Bubbles Group is an expert in surface disinfection. This makes us the ideal partner when it comes to disinfecting surfaces. With our mobile disinfection ULV fogging units, the most advanced hospital grade disinfectants can be applied to surfaces quickly, easily and even over large areas. In this way we support people through our service and contribute to an effective reduction of the spread of viruses.

Don't stress about your furnishings, pets or children: our environmentally friendly products provide a safe disinfection.

# OUR DISINFECTION PROCESS

Our process is based on US EPA, WHO, & EC standards and guidelines

- We will prepare the area for disinfection by removing the paper products and heavy litter from the surfaces.
- Ensure that individuals without PPE are not present in the area to be treated.
- If needed, remove dust from surfaces using our cleaning methods
- Place signs or warning indicators outside the treatment area to indicate that disinfection is in progress.
- We will spray the disinfection chemical using Ultra low Volume sprayers as 20-30 micron mist
- This will cover all the surfaces, including electrical equipment and with 10 minutes of contact time this chemical will kill the virus and other pathogens.
- We will wipe specific surfaces to polish them (e.g., glass, mirrors) or to remove visible residue after the contact time is achieved.
- Occupants can immediately enter the area after treatment is complete

# DISINFECTION REQUIREMENT

**Public Transport  
(Daily Once)**

**Warehouse  
(Weekly Once)**

**Class rooms  
(Weekly Once)**

**Office space  
(Weekly Once)**

**House & Apartments  
(Monthly Once)**

**Café/Restaurant/ Shops  
(Weekly Once)**

**Commercial Outlets  
(Weekly Once)**

# OUR SERVICE QUALITY

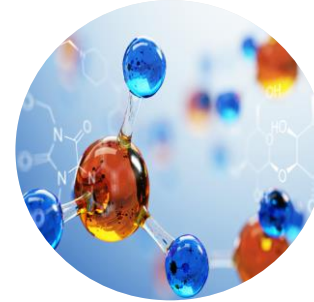

## OUR TEAM

All our staff's are trained professional cleaners, we are providing scheduled training for our employee to do their best possible work in international standards

## OUR TOOLS

We are using professional tools and consumables to clean your premise. These tools are selected based on the specification of construction materials commonly used to increase the efficiency of worthwhile projects

## OUR CHEMICALS

We are using only US brand chemicals like Diversy /Ecolab; to provide most effective disinfection for your high value investments and assets. These chemicals are approved by US – EPA and European Commission against CORONA virus

## OUR SYSTEM

We are following ISO standards in our organization to maintain the transparency and higher quality in our complete process. Our team is committed to provide you 100% satisfaction service
