Philadelphia, PA Comcast (Number of subscribers not available)	2015 (Term: 15 Years)	Two-way activated, fiber to the node design (hybrid fiber-coax), up to 500 homes per node. Electronic components: 750 MHz active, 1 GHz passive. Comcast to pay all costs if system design changes require modifications to PEG facilities. Free expanded basic service drop to public and private schools, public libraries, police & fire stations, community centers, public buildings.	I-Net provided by Comcast, as agreed by City's Chief Innovation Officer. Comcast to provide \$10 million in network construction at no cost to the City. I-Net will provide data transport to 200+ city locations at higher performance level than the current network. City may use I-Net for governmental purposes, including the provision of WiFi services at municipal locations.	Initially: 3 Public, 1 Government, 1 Educational and 1 regional. Current channel positions may not change unless City agrees or required by federal law. Comcast must provide dedicated connections to each PEG master control, deliver all PEG signals without degradation, and use components and provide maintenance services for PEG channels and associated system equipment of the same quality as provided for other channels. Comcast to provide equipment to enable live remote transmissions to PEG master controls. Subscribers must be able to record, select and view PEG channels in the same manner as local broadcast channels. <u>PEG HD channels</u> – 1st: within 120 days of City request; 2nd: 1 year after franchise date, 120 days after City request; 3rd: City may request after 5 years. When 80% of basic channels are only HD, City may request remaining PEG SD channels to be in HD (up to 7 SD/HD channels). Each PEG HD channel to be located near HD local broadcast or news/public affairs channels.	PEG capital grant: 2.5% of Gross revenues, paid quarterly. These payments are not part of the franchise fee. Comcast must provide and maintain the connections to any existing or future PEG playback facility.	Comcast	Side letter agreement permits PEG capital grant funds from Comcast to be used for any PEG-related purposes. Two daily cross-channel spots to promote PEG programs and services. Two annual bill stuffers to promote PEG programs and services.

Fairfax County, VA Cox ~200,000 subscribers	2013 (Term: 10 Years)	System capacity: 860+ MHz Interconnection with other broadband systems to exchange PEG signals, and with Reston cable system's I-Net. Free drop to public schools, public libraries, police & fire stations, to include basic service, most highly subscribed tier of non-basic service (not pay-per-view or premium programming), & converters. Cox to update equipment if required by changes to its technology.	Cox shall construct a bidirectional, fully fiber-optic I-Net (paid for by the County) to link public, educational, and governmental facilities in the County (395 sites specified). Cox shall provide full GIS data regarding I-Net (including fiber count, splice enclosures and other cabinets or fixtures, and locations), in a format that is compatible with the County's GIS system, updated upon completion of the I-Net construction.	Up to 14 PEG channels (1 Government, 5 Educational, 4 Public, 4 reserved). At any time, County may require 3 PEG channels in HD (also available in SD). After 5 years, County may require more PEG HD channels. Cox must provide, install, and maintain all PEG HD transmission equipment. If advanced video format other than HD is primary video feed of half of commercial programmers on Cox system, County may require up to 3 PEG channels in the advanced format. A cable box must not be needed to receive any PEG channel. Cox to update all PEG channel distribution equipment if required by its system design changes. PEG channel transmission quality to be equal to that of any similar commercial channel. Initially, 30 hours of PEG VOD capacity. After 5 years: up to 100 hours of PEG VOD. PEG VOD quality, menu, search, & recording ability same as commercial VOD. PEG & commercial channels to be displayed similarly on Cox's menu system. PEG channels to have same functionality as commercial channels.	PEG Grants: 3% of Cox's Gross Revenues -- for any purpose permitted under federal/state law. Cox to maintain I-Net, its costs for which to be considered as PEG capital costs. Cox to provide all equipment needed for transmitting and headend processing of PEG signals from each PEG origination site in formats specified. Cox's PEG signal transport links shall function as reliably as Cox's system as a whole, no more likely to fail than is the system to fail as a whole.	Cox	Cox waives any claims that its PEG Grants constitute franchise fee payments. Cox to pay all costs to include PEG channels and PEG program information on on-screen and online listings. PEG channel listings included in any printed program guide. Cox to provide free ad inserts to publicize any PEG channel changes.

Chicago, IL RCN ~435,000 subscribers (including Comcast, RCN and WideOpenWest)	2012 (Term: 10 Years)	System capacity: 750+ MHz. One free Expanded Basic service outlet to 48 libraries, schools, fire and police stations, and other public buildings. Interconnection with any other franchisee in City, to transmit PEG and local origination programming. Interconnection to deliver 3 channels from main library and 6 channels from Chicago Access Corp. (CAC) or other designated central interconnection facility. No interconnection charges to City or CAC by RCN.	RCN agrees to cooperate, free of charge, with any City planning process to explore I-Net needs of local govt. and educational institutions.	10% of usable channels provided at no cost to CAC for its non-commercial use and control. Two local government channels provided at no cost to City for its non-commercial use and control. One LO channel provided for use by Chicago producers and businesses, administered by City. CAC and City channels to be delivered in HD (6 months notice for 1st HD channel, then 2 months). CAC and City channels also delivered in SD as long as basic SD service is provided. VOD capacity: 30 hrs/wk for CAC; 30 hrs/wk for City. RCN must provide free equipment and service to CAC and City to transmit and monitor their designated channels. RCN's system shall permit CAC and City to transmit live programs from remote locations. RCN and all other franchisees must designate the same channel number locations on their systems for all CAC channels, at least two govt. access channels and the City-wide LO channel.	To CAC: quarterly payments of 0.67% of gross revenues. To City: quarterly payments of 0.33% of gross revenues. No restrictions as to the City's or CAC's use of these funds from RCN, which are in addition to franchise fees and other payments from RCN to the City.	Cable Company	Funding amounts indicated in equipment & facilities column are unrestricted.
