## END-MATCHED PANELING AT MTM

- END MATCHING IS AN INCREDIBLY BENEFICIAL ATTRIBUTE OF PANELING FROM MTM. WHAT ARE THE BENEFITS?

- EASE OF INSTALLATION - END MATCHED PANELING IS MADE FROM "DEFECTED" SHORTER LENGTHS, TYPICALLY 2' TO 8' LENGTHS. THESE PIECES ARE IDEAL FOR HANDLING BY ONE PERSON WHERE NECESSARY. THESE LENGTHS ARE RELATIVELY LIGHT, AND THEY FIT TOGETHER EASIER THAN LONGER LENGTHS.
- "ZERO" WASTE - WHEN USED PROPERLY, MTM'S END MATCHED PANELING IS ENTIRELY USEABLE; BECAUSE IN CUTTING LONG LUMBER TO SHORTER LENGTHS, WE "DEFECT" THE UNUSEABLE SECTIONS OF THE WOOD. THIS IS TRUE FOR EACH GRADE OF PANELING, INCLUDING "RUSTIC".
- NO NEED TO TRIM ENDS TO LENGTH - WITH TONGUE AND GROOVE ON THE ENDS (MATCHING THE EDGES), THERE IS NO NEED TO MEASURE AND PRE-CUT PANELING PIECES TO END ON A STUD OR RAFTER. THE FLOATING ENDS WILL STAY IN PLACE.
- NO TOUCH UP NECESSARY! - PRE-FINISHED END MATCHED PANELING SAVES TIME & MONEY (AND MESS) BECAUSE THERE IS NO NEED TO CUT THE ENDS, SO THERE IS NO NEED TO "TOUCH UP" THE FINISH ON THE ENDS. PRE-FINISHED END MATCHED PANELING IS THE CONSISTENT CHOICE OF OUR PROFESSIONAL CUSTOMERS ;)
