

WHAT IS FACE WIDTH?

- SIMPLY PUT, FACE WIDTH IS THE ACTUAL VISUAL COVERAGE FOR EACH PIECE OF FLOORING OR PANELING.

- MTM WILL ALWAYS SPECIFY WHETHER WE ARE TALKING ABOUT FACE WIDTH OR NOMINAL SIZE. WE USE FACE WIDTH TO DO ALL CALCULATIONS.

* NOMINAL SIZE IS THE APPROXIMATE DIMENSION OF THE RAW LUMBER FROM WHICH THE FINAL PRODUCT IS MILLED. NOMINAL SIZE IS NOT EXACT. DIFFERENT MANUFACTURERS MILL PRODUCTS TO DIFFERENT FINISHED SIZES, OR FACE WIDTHS. SO THE NOMINAL SIZE SHOULD ONLY BE DISCUSSED AS A REFERENCE

EXAMPLE:
" " " " " "
NOMINAL 1x4 LUMBER
@ MTM MILLS TO
A FACE WIDTH OF 3".
