## Multiplying Jars – Puzzle (Older Elementary)

In today's Bible story, God provides for a widow and her sons. The woman in today's story fills many jars with oil. Let's count by 2's to see how quickly the oil might've multiplied. Start with the first jar and count "two." The next jar would be "four," followed by "six," and so forth. When you get to the last jar, write your answer at the bottom of the page. Then count by 3's, 4's, 5's, 6's, 7's, and 8's. Write your answers for each number at the bottom of the page.

Multiplied by 2 \_\_\_\_\_ by 3 \_\_\_\_\_ by 4 \_\_\_\_\_  
by 5 \_\_\_\_\_ by 6 \_\_\_\_\_ by 7 \_\_\_\_\_ by 8 \_\_\_\_\_
