

# September Stars and Constellations – Home Activity

Stars move across the sky and change each season. Constellations and asterisms are star pictures made from groupings of stars. The star pictures below can be found this month by facing South.

## SOUTH

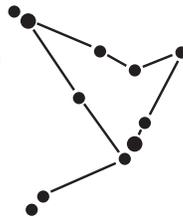

"Scorpius"  
This constellation resembles a scorpion!

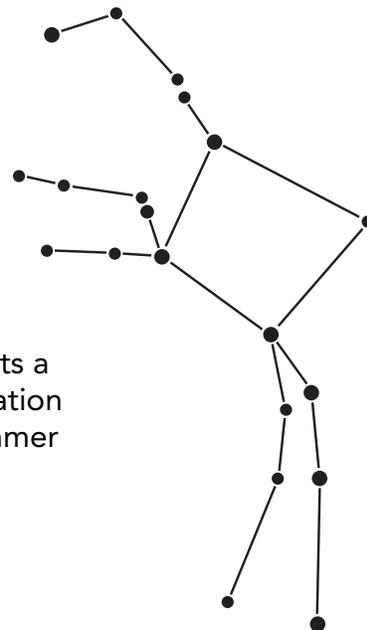

"The Teapot"  
This asterism (star picture) is part of the constellation Sagittarius. It looks like an upside-down teapot.

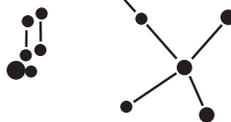

"Aquila" represents an eagle. This constellation is part of "The Summer Triangle."

"Pegasus" This constellation resembles a winged horse.

"Lyra" represents a musical instrument. This small constellation is part of "The Summer Triangle."

"Cygnus" represents a swan. This constellation is part of "The Summer Triangle."

The star pictures on the left side of the page will appear earlier in the night. The star pictures on the right will appear later as the night goes on.
