For referring offices

When to consider a referral

Refer when vision loss makes everyday tasks difficult despite usual correction or treatment.

Start with a phone call

Call **936-569-2015** to arrange a free telephone consultation with Dr. Pierre, Optometrist. Our office will coordinate obtaining a copy of the patient's most recent eye examination.

Continued eye care matters

Low vision rehabilitation complements ongoing care. Patients should continue visits with their treating eye doctor.

Your vision. Your goals.

What is low vision?

Low vision is lasting vision loss that makes daily tasks difficult even with regular glasses, contacts, or usual treatment.

What would you like to do?

- **Read** mail or a favorite book.
- See faces or **watch television**.
- **Use a phone** or computer.
- Enjoy **hobbies** and daily routines.

Tools to explore

Specialized low vision glasses and telescopes, magnifiers, electronic tools, and lighting or contrast strategies.

Your vision and goals are unique. We'll explore ways to make the most of your remaining vision for the activities that matter to you.

Start with a conversation

1. Free telephone consultation

Talk with Dr. Pierre, Optometrist, about what you want to do more easily and whether low vision care may help.

2. Your low vision evaluation

After the call, Dr. Pierre, Optometrist, will recommend whether an in-person evaluation is the next step.

Bring to your evaluation

- Current glasses and vision aids.
- Your medication list.
- A book, phone, or sample task.
- A support person.

Take the next step

Call for your free telephone consultation.
