360° Voice Pickup and Positioning

4 omni-directional microphones allow you to be heard anywhere in the room. The smart audio algorithm detects the active talker's position and the ring light illuminates on the corresponding side, denoting the incoming human voice direction accurately.

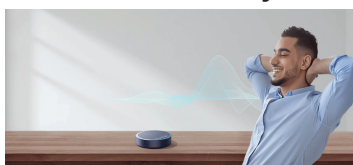

Top-of-the-Class Noise Filtering

Equipped with the latest exclusive VoicelA® 4.2 algorithm, M3 is capable of eliminating echo and blocking out up to 200 types of background noise with deep learning, making sure that the other end of the conversation hears but crystal-clear voice.

5W Speaker with Convincing Sound Quality

Built with a composite diaphragm and an independent speaker cavity, this 5W, 45mm speaker features an auto switch between conference mode for crystal-clear human voice and music mode for Hi-Fi sound with thick low frequency and penetrating treble, relaying every detail, and every rhyme to your ears without distortion.

Full Duplex for Ultra-Smooth Conversation

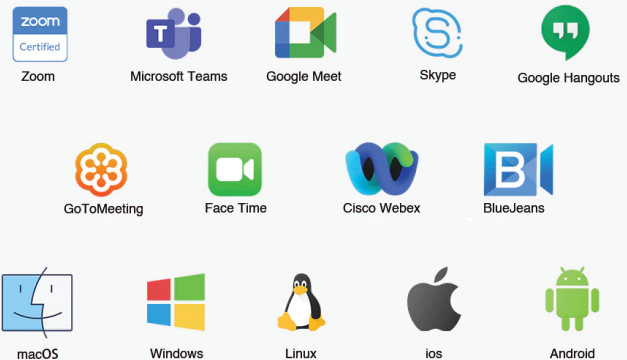

To keep conversations flowing as they do in reality, full duplex technology works wonders, ensuring freedom of expression at any time. No need to wait for your turn in a heated discussion, just feel free to talk as both ends of the conversation are transmitted at the same time.
