sunergise® | clay energy

JOB VACANCY ANNOUNCEMENT

Clay Energy is Fiji's leading renewable energy company and part of the Sunergise Group, the largest privately owned commercial and industrial solar company in New Zealand and the Pacific. Clay Energy has over 27 years of experience delivering renewable energy solutions across Oceania. Collectively, the Group has delivered more than **170 large-scale renewable** energy projects across Oceania, with a total deployment of **50MWp** of solar PV. The Group is committed to driving the energy transition through innovative solar and microgrid solutions across New Zealand and the Pacific.

There is an immediate opportunity for the following position:

Senior Technician

Reporting to the Construction Manager, this position requires an experienced and qualified electrical person for installation and servicing of renewable power system.

Preferred experience and qualifications include:

- Tertiary qualification in an electrical discipline
- At least 5 years' of industry experience
- A Wireman's Licence will be an added advantage. Candidates who do not currently hold one should be willing to work towards obtaining it.
- Thorough understanding of AC/DC power systems
- Ability to manage and lead installation teams
- Ability to troubleshoot electrical problems
- Excellent knowledge of electrical and installation standards
- Good customer relations
- Excellent health and safety awareness
- Knowledge of Renewable Energy systems will be an added advantage
- Valid group 2 driver's license

We offer attractive remuneration and working conditions that are commensurate with experience.

To apply, please email a covering letter together with a CV to the HR Manager, Clay Energy no later than **Friday 13th November 2026** on email: **hr@clayenergy.com.fj**

For more details on the role please contact HR Manager on email **hr@clayenergy.com.fj**

Only shortlisted candidates will be contacted. Vacancy is open to Fiji Nationals only.
