

JOB VACANCY ANNOUNCEMENT

Clay Energy is Fiji's leading renewable energy company and part of the Sunergise Group, the largest privately owned commercial and industrial solar company in New Zealand and the Pacific. Clay Energy has over 27 years of experience delivering renewable energy solutions across Oceania.

Collectively, the Group has delivered more than **200 large-scale renewable** energy projects across Oceania, with a total deployment of 50MWp of solar PV. The Group is committed to driving the energy transition through innovative solar and microgrid solutions across New Zealand and the Pacific.

Senior Project Engineer

Position Summary: Reporting to the Engineering Manager, the Senior Project Engineer will lead the design, engineering, and implementation of large-scale commercial solar PV projects. The role provides technical leadership throughout the project lifecycle while mentoring junior engineers and ensuring engineering excellence.

Preferred experience and qualifications include:

- Degree in Electrical and/or Electronics Engineering
- Minimum 5 years' work experience in engineering design
- Previous work experience in Renewable Energy field
- Proven ability to lead, mentor, and develop junior engineers.
- Excellent knowledge of electrical engineering design and installation standards
- Experience in control and communication systems for electrical plants will be an advantage
- Knowledge of MV/HV installations will be an advantage
- Strong commitment to Quality, Health, Safety and Environmental (QHSE) standards
- Experience and/or qualification in project management, including planning, stakeholder management, budgeting, and project delivery, will be highly regarded

We offer attractive remuneration and working conditions that are commensurate with experience.

To apply, please email a covering letter together with a CV to the HR Manager, Clay Energy no later than **Friday 16th October 2026** on email: hr@clayenergy.com.fj
