Crafting welding solutions with precision, dedication and a client-first approach defines ArcPro's commitment to excellence.

OUR PURPOSE

Experience reliable and high-quality welding services with ArcPro Welding, where tailored solutions meet proactive planning

Founded by Cory Hill and Chantal Zander, ArcPro Welding Services is built on a proactive, client-focused approach that never compromises on quality. With a reputation for efficient project timelines, we consistently exceed timeframe requirements.

Our dedication to open communication ensures clients remain informed about project progress, enabling us to adapt to their evolving needs while maintaining high standards. This commitment to quality, efficiency and client satisfaction defines our role in the welding industry, ensuring every project is completed with precision, reliability and unmatched expertise.

OUR SERVICES

ArcPro Welding Services delivers mobile, high-calibre welding and fabrication solutions that adapt to client needs. We specialise in proactive maintenance planning to minimise downtime, offering flexible scheduling and expert craftsmanship. Our fully equipped mobile workshop ensures precision welding services on-site, supporting projects with unmatched quality and adherence to stringent industry standards.

✓ GENERAL WELDING AND FABRICATION

Our skilled team provides comprehensive welding and fabrication services tailored to diverse project needs, including pressure welding and custom components. We ensure all work meets the highest industry standards.

✓ PIPE WELDING

Our certified welders specialise in pipe and pipeline welding for various materials and sizes, delivering an end product that meet Australian standards and ensure efficient performance for installations and repairs.

✓ OIL AND GAS PROJECTS

We offer specialised welding for oil and gas projects, ensuring that pipelines, tanks and infrastructure are constructed or maintained to stringent industry standards, prioritising safety and operational efficiency.

✓ STRUCTURAL STEEL

From beams to frames, our structural steel welding and fabrication services guarantee robust, durable structures that comply with industry codes, perfectly supporting commercial and industrial construction projects.

✓ SHUTDOWN MAINTENANCE

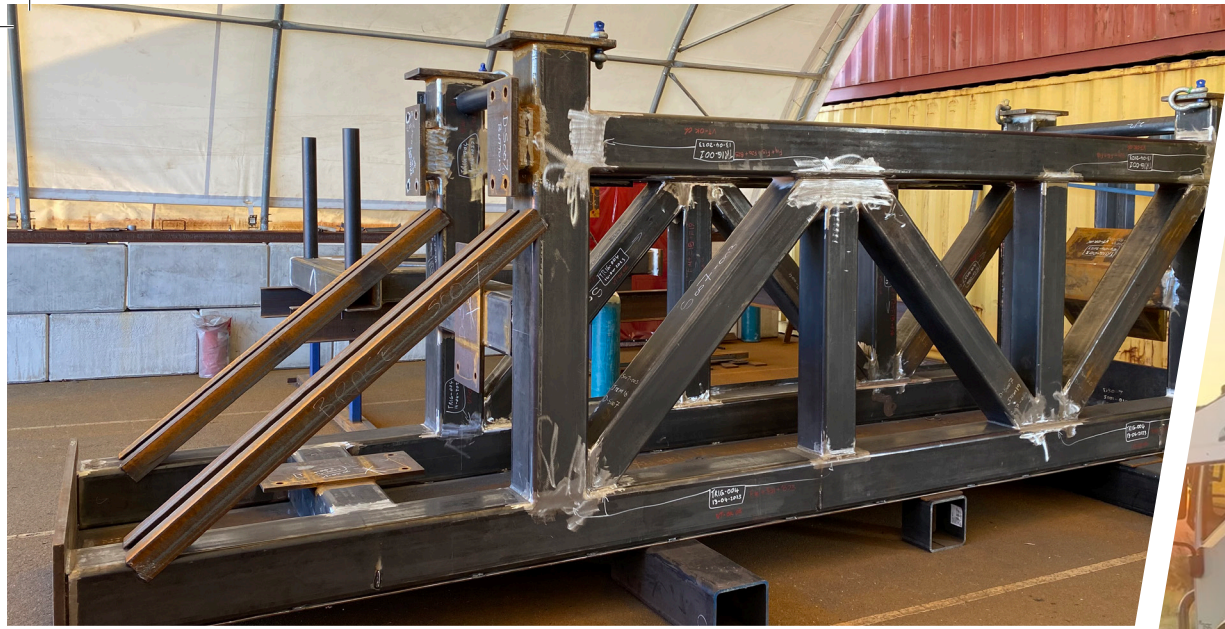

During planned shutdowns, our team excels in inspection, repair and replacement of critical components to minimise downtime and optimise operations, offering tailored, reliable support to power stations and refineries.

✓ WELDING SUPERVISION

Our welding supervisors oversee projects to ensure weld quality, safety compliance and adherence to client specifications, providing expert guidance from planning to inspection for consistent results.

✓ WELDING PROCEDURES

We develop and qualify welding procedures to Australian standards, ensuring your team follows precise instructions for achieving consistent, quality welds across different projects and materials.

INDUSTRIES WE SERVE

ArcPro Welding Services delivers high-quality, tailored welding solutions across various industries. Our mobile capabilities ensure efficient, on-site support, helping clients complete projects smoothly while maintaining strict standards for quality, safety and compliance, no matter the sector or location.

Energy

Oil and Gas

Construction

Transportation

Government

Local Council

Mining

Food Production

Agriculture

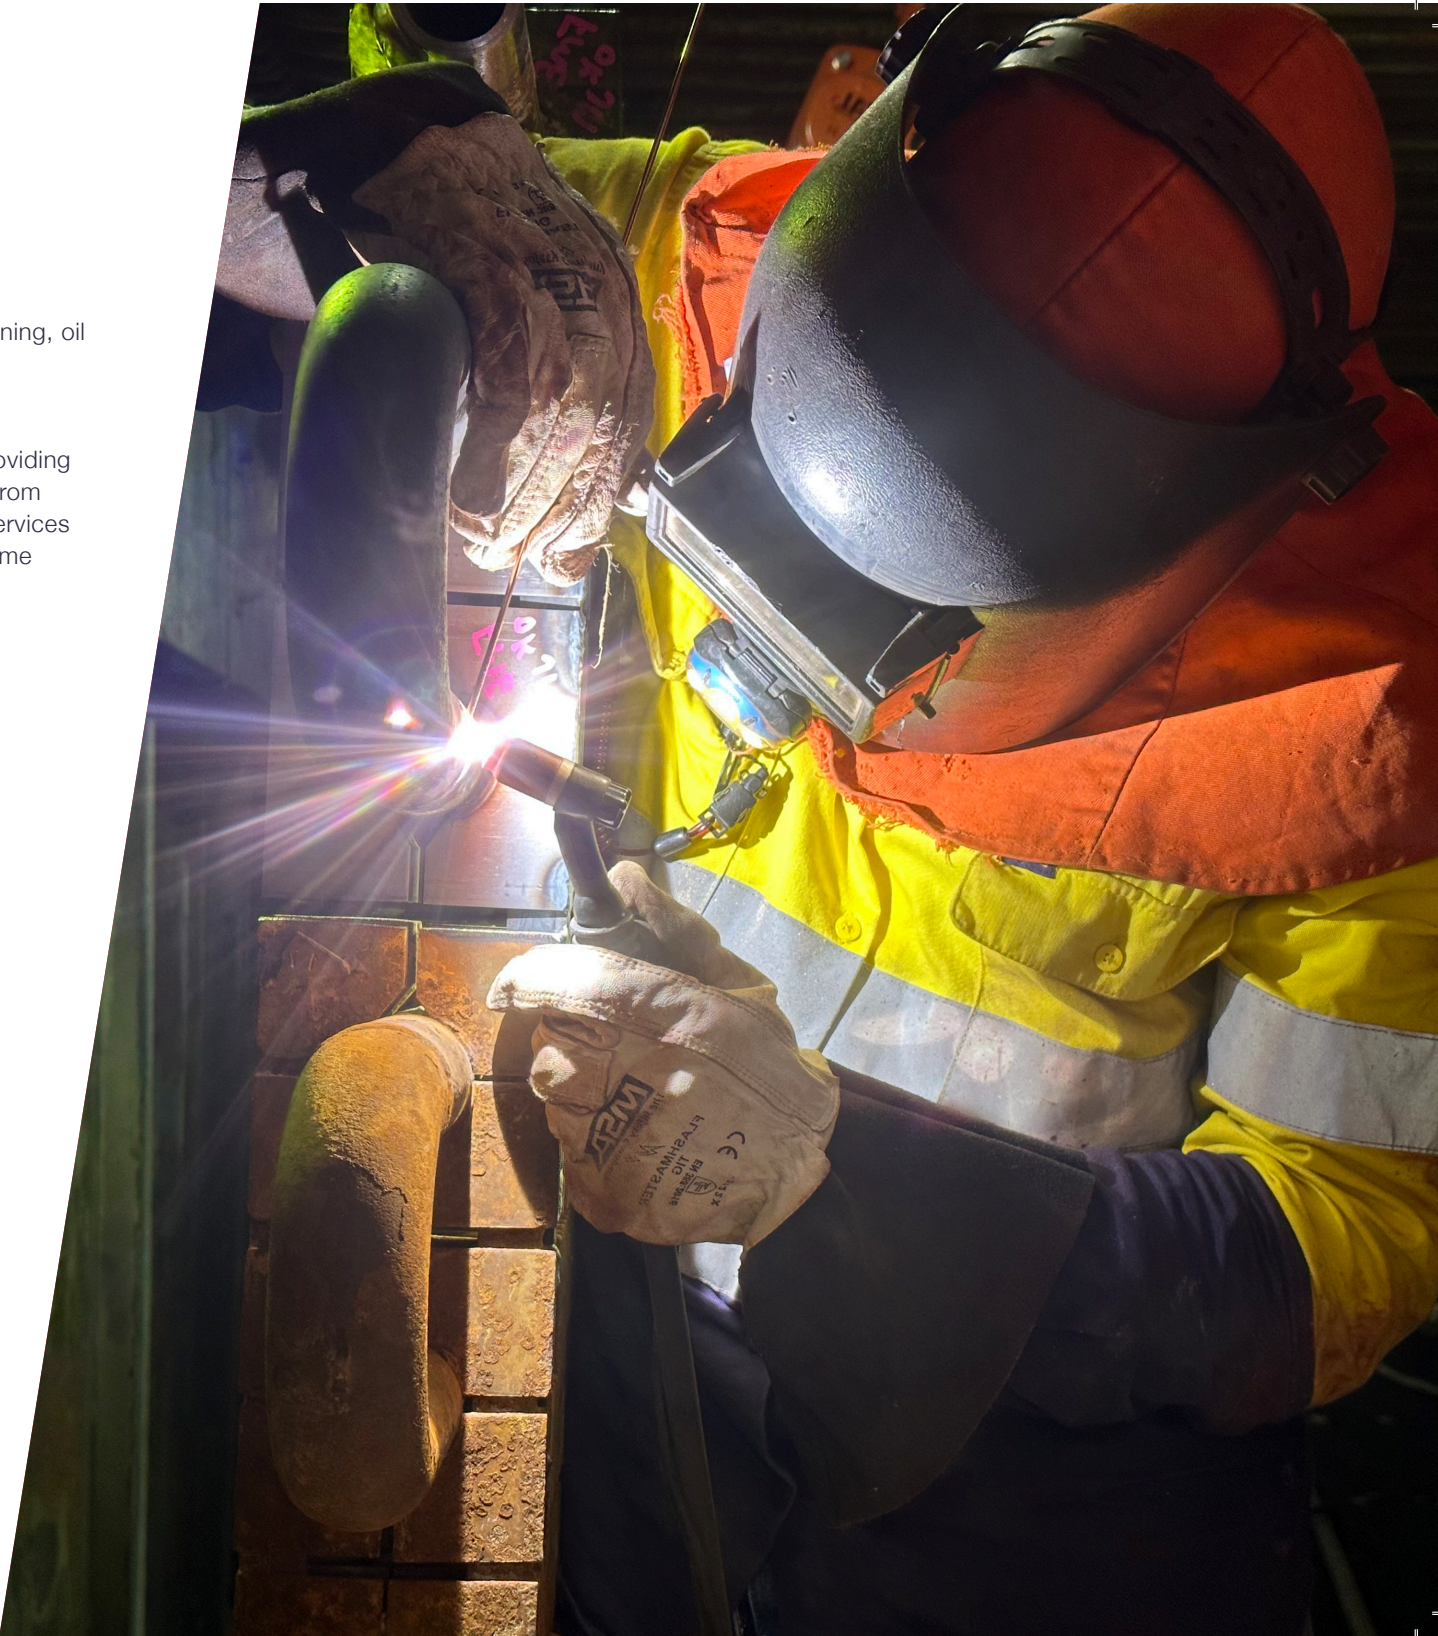

ArcPro Welding Services ensures efficient project completion through clear communication, keeping clients updated while consistently delivering high-quality results.

OUR CLIENTS

ArcPro Welding Services proudly serves a diverse clientele across mining, oil and gas, construction, transportation, government, local council and energy sectors.

Our mobility enables us to support clients wherever they operate, providing on-site welding solutions with our fully equipped mobile workshop. From remote locations to urban settings, we deliver high-quality welding services tailored to the specific needs of each client, ensuring minimal downtime and maximum convenience.

CASE STUDY / FABRICATED PIPELINE PROJECT

✓ THE PROJECT:

Our client embarked on their first pipeline project but lacked an internal team with the expertise to meet welding standards and handle the tight completion timeline. Recognising the need for high-quality welds and efficient project management, they sought ArcPro Welding Services for specialised support in delivering reliable, safe and industry-compliant results.

✓ OUR APPROACH:

ArcPro Welding Services assembled a team of experienced pipeline welders, whose specialised skills ensured compliance with rigorous standards. We meticulously planned and organised resources, coordinating closely with the client to meet their unique requirements. Our qualified team were able to effectively adapt to our client's onsite resources with our combined knowledge and experience of pipelines allowing us to deliver timely, high-quality welding solutions.

✓ THE RESULT:

The ArcPro team consistently produced exceptional welds that met all quality standards without any failures. By utilising our team's skill and commitment to excellence, we completed the project up to 2.5 times faster than expected, exceeding client expectations with reliable results. Our prompt and precise service highlighted the value of choosing ArcPro for efficient, high-quality pipeline welding.

- ☆ Completed welding on a 6-kilometer pipeline.
- ☆ Used 2.5 tonnes of Fluxcore welding wire efficiently.
- ☆ Delivered high-quality results with no failed welds.
