USGAA FINALS BOSTON 2026

An emergency is an unforeseen event or condition requiring prompt action. Emergencies at The Irish Cultural Centre can be generally classified as medical emergencies, fire/fire alarm emergencies, and public safety emergencies & environmental emergencies. Emergency conditions either affect an individual, a small group or the entire campus. In the case they affect the entire ICC campus they typically involve the evacuation of the campus.

Campus Evacuation

There are many reasons a campus may have to be evacuated. The most common reason for evacuation is due to fire alarm activation. Other reasons for evacuating a campus include, but are not limited to a bomb threat, environmental condition or a physical threat. When you are asked to evacuate the facility by Public Safety personnel, law enforcement or the fire alarm sounds:

1. Collect all personal belongings including jackets, briefcases, gym bags, etc. Why? Because you can't count on returning to the building and fields and in the case of a bomb threat such items would be considered suspicious and handled as a possible "device".
2. Immediately leave the building and fields following any verbal instructions and follow the evacuation route posted adjacent to the primary ICC exit door.
3. Staff will assign someone to provide assistance in assuring persons with disabilities are directed to the evacuation point.
4. Staff should turn off all gas and electrical appliances. The lights should be left on, the corridor doors closed and left unlocked.
5. Upon exiting the building move well away from the building and fields. This will prevent a "log jam" of people at the entranceway and allow the fire department swift access.
6. Re-entry: The ICC personnel shall notify you when it is safe to return to the building and fields.

Visitors should also take time to review the evacuation route posted next to the primary ICC exit door.

We recommend that persons with disabilities identify themselves to a staff member if they feel they may require assistance during an evacuation. Together they

can formulate an evacuation plan. **Under no circumstances are the elevators to be used when a fire alarm is sounding.**

Timely Warning Procedures

The ICC Alert system is intended to give players, visitors and staff timely notifications of incidents that may present an immediate threat to the campus and to heighten safety awareness. The alerts can also be used to assist law enforcement agencies with widespread communications to our campus with valuable and timely information to assist them with the management of an operation.

The safety of our visitors and staff is paramount to the ICC. The ICC has created an Emergency Management Team consisting of more than 10 staff and board members to oversee all operations on campus, both during a crisis as well as in the planning and preparedness stages.

The Emergency Management Team shall be responsible for the activation of an ICC Emergency Alert when an incident is reported to the team and rises to the level of a required widespread communication. The Emergency Management Team shall determine if there is a significant emergency or dangerous situation, determine the appropriate community members that should receive the notification, determine the content of the notification and initiate the notification system.

Every effort will be made to distribute the alert in a timely manner; however each release is subject to the availability of accurate information concerning the incident and if releasing information will compromise efforts to assist a victim or to contain, respond to or otherwise mitigate the emergency. Alerts are distributed to visitors and staff through a variety of sources, including text messaging, phone calls, social media, or email.

Other manners of communication, such as oral communications from security and Emergency Management Team personnel and audible instructions on the intercom system will also be used when necessary.

For questions related to emergency responses, evacuation procedures and timely warnings, please contact Ollie Garry, Chairperson of the USGA Finals Host Committee 508-962-9961.
