RESIDENTIAL SERVICES

www.elabatement.com

EnviroLogical Elements, Inc. offers our residential clients accurate, professional, timely and courteous services .

Asbestos Abatement

Asbestos was commonly used in construction for many years in items such as tiles, shingles, insulation, siding, caulk and joint compound. Allow our experienced, certified work force to safely handle your asbestos abatement needs.

Lead-Based Paint

Lead-based paint requires specialized stabilization, encapsulation and abatement techniques to ensure contaminants are safely handled. ELE is EPA certified to conduct these regulated activities.

Mold Remediation

Mold causes hazardous conditions and can lead to a multitude of health issues. To ensure proper removal, allow our team to deploy professional-grade air-scrubbers, fungicide and encapsulants.

Selective Demolition

Walls, floors, fixtures and more... our crew will properly prepare your space for the next phase of renovation. Clients are always amazed at the quality of detail we take in our work.

ADVANTAGES

- 25+ Years Experience
- Licensed Asbestos Contractor
- Certified Mold Remediation Contractor
- Licensed Lead-based Paint Contractor
- Licensed Lead-Based Paint (RRP) Contractor
