|----------------------------|---|
| Call to order | Meeting was called to order by Dr. Clark |
| Scene Time Data | <p>Group reviewed updated scene time data sent out by Michael. Michael noted that previous data included a significant number of interfacility calls. Group noted that there were not a lot of calls with abnormal vital signs that would have alerted crews. Michael noted that there were a fair number of cases that did not result in a trauma team activation at the hospital. Maybe EMS units could provide better information to the hospital about the patient and long scene time to trigger one.</p> <p>Group discussed developing a summary of the data to share with EMS services and include a list of recommendations (best practices) to improve scene times. Document could be sent out with other information we want to highlight with EMS such as our existing EMS-related position statements. Will also include the training equipment catalog.</p> <p>Group discussed EMS trauma courses. May look at using funds next year to bring a course in.</p> |
| DMIST Card | <p>Group reviewed the draft of the DMIST card that Michael sent around. Michael is confirming all the phone numbers on it. Recommendation to change the bullet point to a check box.</p> <p>Once completed, we will post a Word version so services can download and personalize the back (hospital list) if they like.</p> <p>Michael will finish the card and get copies printed and laminated for distribution.</p> |
| Training equipment catalog | Group reviewed the training equipment catalog Michael had sent around. No changes noted. Michael will complete it and get it posted and available for distribution. |
| Storage Locker | Adam asked if anyone knew of any climate-controlled storage facilities in the Wausau region as we are looking at moving the HERC/RTAC locker. |
