

CIRRUS[™]
SAFE

The file storage platform that rewards you to use it.

Welcome to Cirrus Safe—the future of file storage.
Like Dropbox, but smarter. Safer.
And infinitely more rewarding.

Cirrus Safe is integrated to the revolutionary Gnode Blockchain, where every file stored, feature used, and friend invited doesn't just organize your digital life—it earns you real daily digital rewards. This isn't just cloud storage.

This is Cloud Freedom.

Why Cirrus Safe?

Maximum Security. Maximum Control.

Cirrus Safe integrates directly with a network of thousands of individually licensed Gnode nodes. These nodes track, verify, and secure your data across a decentralized network. Today, Gnode nodes track user engagement and broadcast their report to the Gnode blockchain to calculate and distribute daily rewards.

Earn Every Day. Just By Using It.

Unlike other storage platforms,
Cirrus Safe rewards you.

When you **Store** your files,
you **Earn** digital rewards

Simple. Transparent. Fair.
Decentralized by Design

No Big Tech. No data mining. No surveillance capitalism. Just you, your files, and a network built to protect your rights—not sell your data. Cirrus Safe leverages the Gnode blockchain to distribute your files securely across the globe, reducing risk and eliminating central points of failure.

Your Data works for you.

With Cirrus Safe, your storage activity can earn you digital rewards based on your participation. As the Gnode ecosystem continues to expand, early contributors help shape its growth and utility.

Cirrus Safe is not just about storage—it's about engagement economics. Here's how your everyday digital actions turn into real rewards.

Action Rewards

| | |
|----------------------|---|
| Upload files | ✓ |
| Sync devices | ✓ |
| Share files | ✓ |
| Invite users | ✓ |
| Use premium features | ✓ |

Coming Soon. Encrypt Files on Your Own Node.

Imagine owning a piece of the infrastructure that powers Cirrus Safe. In the near future, you'll be able to expand your Cirrus Safe experience by storing files on your own node, encrypting your own files, and contributing directly to the network. It's the ultimate upgrade: from user to owner.

Disclaimer:

Cirrus Safe is a decentralized file storage platform integrated with the Gnode blockchain. Any digital rewards earned through the use of Cirrus Safe are distributed based on user engagement and activity, as recorded by the Gnode network. These digital rewards are not guaranteed, and participation does not constitute an investment or promise of profit. Cirrus Safe does not offer financial products or services. All users are responsible for understanding applicable laws in their jurisdiction and managing any tax or legal obligations arising from the use of the platform.

Cirrus Safe is storage with purpose.

Cirrus Safe doesn't just protect your data—it protects your freedom, your privacy, and your right to benefit from your own digital activity.

So, stop paying to be surveilled. Start earning for participating.
