

EV Charging Stations

Many States and Local Utility Companies offer a range of Electric Vehicle Charging Station (EVCS) incentives, rebates & grants for the installation of qualified equipment. E-3 Energy Advisors helps navigate and expedite the process. From site validation & network set-up to long term maintenance & customer support, E-3 manages all aspects of the EVCS installation.

E-3 Conducts Site Validation:

- Determine Electric Power Requirements
- Location & Number of Eligible Parking Spots
- Future-Proofing Consideration

E-3 Delivers Review & Assessment:

- Owner/Operator vs. Alternate Hosting Options
- Incentive & Grant Optimization
- Manufacturer Comparison and Recommendation

E-3 Manages:

- Installation
- Site & Network Activation
- Ongoing Customer Support
- Energy Consumption

Eligible Publicly Accessible Locations:

- multi - unit dwellings
- hospitality & retail
- work place
- municipalities
- schools/universities
- athletic centers
