

# ASK FOR SENTRICON®.

## THE SENTRICON® SYSTEM HOW IT WORKS.

The Sentricon® system is like no other termite control. It uses termites' very nature — their constant foraging in search of food — against them. Worker termites find the bait in the Sentricon stations while foraging, and share it with the queen and other colony members. Sentricon stops the process of molting which ultimately affects the queen and reproduction and kills the workers. The colony then crumbles and is eliminated.

## SEINTRICON STATIONS ARE PLACED IN THE SOIL AROUND YOUR HOME.

## 60+ SCIENTIFIC STUDIES PROVE IT WORKS

“I've always heard the saying, 'The house you live in either has termites or it's going to have termites.' I WOULD RECOMMEND **SEINTRICON** so that if you have that house that doesn't have termites, it will stay that way.”

— SCOTT B.  
Homeowner, Perry, FL

# IT'S YOUR HOME. PROTECT IT FROM AN AROUND-THE-CLOCK EATING MACHINE.

Eat. It's what termites do. They tunnel from colonies hidden underground through the soil to find sources of food — including your home. The Sentricon® system uses this constant foraging, their very nature, against them. They prefer Recruit® HD, the bait used in Sentricon, nearly 10x more than wood, so they eat it instead of your house. And when they eat it, they can't molt. And when they can't molt, they die.

Eliminate the Colony. Eliminate the Queen. Protect Your Largest Investment.

## KNOW YOUR CASTE OF CHARACTERS.

Termites have thrived since the days of the dinosaurs. Over thousands of years, termite caste roles have evolved in a highly efficient and effective way. This has allowed termites to work together as a colony to thrive and survive. It's no wonder why they've been around for longer than 250 million years!

### QUEEN

Capable of laying millions of eggs.

### KING

Reproduces with the queen.

### SOLDIERS

Defend the colony against predators, like ants.

### SWARMERS

Fly off and start new colonies — just hundreds of feet from your home.

### WORKERS

Forage the length of a football field looking for food — 24/7/365.

# GET THE FACTS. STOP THE ATTACK.

TERMITE DAMAGE HAS COST  
U.S. HOMEOWNERS

**\$5 BILLION PER YEAR.**

**"SILENT DESTROYER"**

USUALLY, TERMITES GO UNNOTICED UNTIL AFTER  
**THE DAMAGE IS DONE.**

REPAIRS CAN COST  
**THOUSANDS\$.**

**IT'S COMMON FOR 2+ COLONIES TO FORAGE AROUND A HOME.**

STILL NO CONTEST FOR SENTICON®.

**1/16 INCH GAP OR CRACK LEAVES YOU VULNERABLE TO TERMITES**

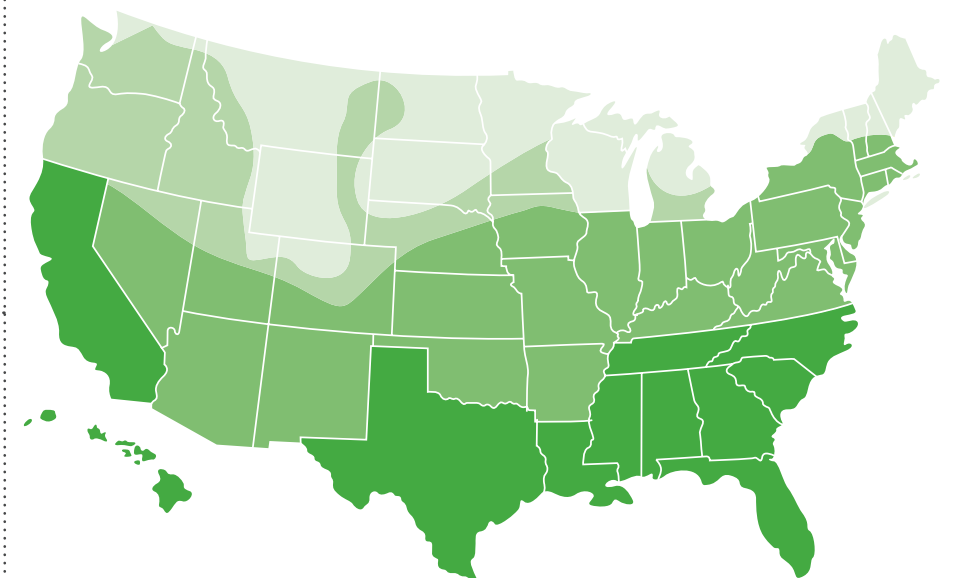

TERMITES CAN TRAVEL MORE THAN 100 YARDS IN SEARCH OF FOOD.

**IF YOUR NEIGHBOR'S NEIGHBOR'S NEIGHBOR HAS TERMITES, YOU COULD, TOO.**

**TERMITE DAMAGE IS RARELY COVERED BY HOMEOWNERS INSURANCE.**

ACTUALLY, LESS THAN RARELY.
