Prolificacy:

Gestation: 38 days

Pregnancies/Family Size: 1D8P

Brood Size: 4D6P

Genders: 87% / 13%; families may vary

Sleep Routine: 8<24; Nocturnal

Age Groups & Ages: Androgenous / Female

Child (phase 1-10): 4-6 / 6-11

Preadolescents (phase 11-20): 7-13 / 12-19

Adolescence (phase 21-30): 15-21 / 20-37

Adult (phase 31-40): 22-31 / 38-93

Mature (phase 41-50): 32-44 / 94-142

Middle Aged (phase 51-60): 45-68 / 143-195

Elderly (phase 61-70): 69-82 / 196-225

Ancient (phase 71+): 83+ / 226+

Features (Both): Complexion has varying wavy thin stripes and rows of small spots viewable in the mid to high ultraviolet colors, otherwise seen as non-distinct gray. Extremely large trianular (inverted pear) heads.

Androgenous: For the purpose of the game, these characters would not be selected for mating.

Male: Males transform from androgenous gender for mating, which is fatal, so not available for charcter creation.

Female: S

Attributes: Both androgenous and females continually grow their entire life, with females living much longer. The listed height is for the early adulthood.

Androgenous: Non-fertile

Female:

Special Abilities: None.

1) Since the race has lost most of the connection to the primitive nature and the mystic realm with it, all rolls for Clairioance and related skills/spells gains +16 D-Mod added to it. For this reason, they rarely venture into such occupations.
