

## Build Your System, Your Way

The QBase® Mount is a strong and versatile base-and-post mounting system with various post height options. The components are available separately and combined to build a custom solution that best suits your project. *(Formerly sold as QMLSH and QMQDM kits or BTO)*

The QBase® Mount is made of super-strong cast aluminum, with four gussets to support 8 post heights from 3.25 to 17.5” —for a wide variety of roof types and installations. QBase® Mount’s versatility and superior strength will provide decades-long confidence.

 This component is part of the QuickMount® product line.

### Attaches to Roof Deck or Structural Member

When utilized as a rafter-attached mount, two 5/16”x3” stainless steel lag screws with a minimum of 2” embedment into the structural member are recommended. For non-rafter attached applications, consult with a Structural Engineer to specify the type, size, and quantity of roof screws.

### 8 Available Post Heights

Posts include post-to-rack hardware, with sizes available in 3.25”, 4.5”, 6.5”, 8.5”, 11.5”, 12.5”, 14.5”, and 17.5”.

### Best-in-Class Testing & Approval

Components have been formally approved by the City of LA (LARR #26194) and the State of Florida (FL #29846).
