

# NORCAR (TRACKED) ALL-TERRAIN WINDOW SAMPLING DRILL RIG (SOCOTEC HOLDING 2NO.)

This window sampling drill rig mast is mounted on an all-terrain tracked mini-telehandler and comes complete with support trailer with low bearing pressure wheels.

- Low ground bearing pressure set-up, reducing the need for track matting on site
- Low pressure set-up also reduced ground surface disturbance on sensitive sites
- Rotating mast, allowing for easy levelling on uneven ground
- Extending boom for working on slopes
- Slope working reduces manual handling risk involved when using modular rigs
- Centre articulation for manoeuvring in tight spaces
- Faster tracking between locations than standard rig – ideal for large and/or linear sites
- Bespoke support trailer to carry drilling equipment and samples
- Machine can be fitted with wheels on request
