Travelled to SOCOTEC Medium CPT Crawler at Works Compound, Leisure Drive, Lower Boddington. CV47 7SR. On arrival carried out site induction and COVID 19 test. Investigated complaint of machine not tracking properly on the left hand track. Found the left hand travel lever to be very loose. Removed the floor panels and seat to access the travel lever push rods and shaft. Found a lot of rot and the main bracket holding the travel lever shaft had corroded away. Took measurements and travelled back to the yard. Fabricated new small bracket and painted as unable to source a genuine Yanmar equivalent. Travelled back to site and fitted replacement bracket. Whilst fitting the bracket noticed one of the rods that anchor the push rod assembly down had rotted off and come loose, the only way to fix this was to jubilee clip the rod to the opposite side rod to keep it anchored. This solved the problem and the machine drove on both sides. Isolated machine and return to-the site office - explained repairs to the manager and that the machine was OK to use. Recommend machine is overhauled in near future to rectify issues of rust/rot.
