

CONSTRUCTION

CAPABILITIES STATEMENT

Company Profile

Wesco Construction is a service-oriented general contractor with strong knowledge and experience in federal procedures, methods, and regulations. We have trained and talented construction management & administrative professionals who are responsible, responsive, easy to work with and ready to serve you. We have well planned out solutions, for constructability, serviceability, functionality, and cost-effective services, with lofty standards in safety and quality control. We have the capability to perform the following in-house trades: tile, drywall, painting, framing and infection control. Every project is run with implicit cost control and optimization of budgets and schedules.

Core Competencies

Among the core competencies that allow Wesco Construction to turn over successful, on time, on budget, and safe projects are:

- Managing site safety
- Implementing a successful QC/QA program
- Trained and talented construction management & administrative professionals
- Tactical solutions for constructability, serviceability, functionality, and cost-effective services
- Managing supply chain disruptions and planning for long lead items

Differentiators

Our Safety Record – Wesco Construction has received numerous safety awards from federal agency customers and currently has an **EMR of 0.86 with a DART rate of 0.00.**

Our Experience with Federal Procedures – Wesco Construction knows federal work procedures (site safety, billing, payroll, documentation, quality control, reporting, badging, testing/inspection, etc..).

Our Approach – Wesco Construction always strives to be a service-oriented contractor with the goal of minimizing the stress of construction for our Govt. counterparts and their users. We also pledge to be fair and reasonable with our RFP cost proposals.
