

MINIMALIX

THE INTERIOR DESIGN E-BOOK

Ideas for your home

ABOUT US

We are a team of enthusiastic brains that guide our millennials with the ancient wisdom of minimalism. Founded in 2018 September month, Minimalix powered by WhiteVillage Corporation Pvt Ltd. began its modest journey from the urbans of Gurgaon. With the revolutionary concept of minimalist living, we have ventured into the market of minimalist co-living spaces (including Home Décor) that has led us with the idea of beautification and decluttering of any space. Today, we are a robust family of thirty talented and self-motivated individual entrepreneurs who have the potential materialize anything in minimalistic way.

We serve our clients and customers with best experience of minimalist community with a wide range of products and services that includes minimalist co-living spaces, minimalist interior design services, minimalist food and much more. Being a minimalist is clean and green and we believe, it to be the need of the hour. Our earth can cater to the needs of all the humans who co-exist here but not to their wants. Now is the perfect moment to realize that and act upon it. Let us begin the movement of minimalism for a sustainable future.

OUR VISION

Our vision is to inspire the world to bring cultural revolution with the gift of minimalism.

OUR MISSION

Our mission is to get more people believe in 'less is more' minimalism, raising the standard of living of the society and create a joy to serve all our stakeholders with maximum return on investments

CONCEPT OF MINIMALISM

Getting hyper-productive comes along the way after reducing your life to keep only what is essential and letting go of what does not really make sense. Minimalism is a green concept for optimal utilization of nature's resources keeping our carbon footprint minimum. We at Minimalix innovate ideas that bring peace, community and wellbeing in your life with the concept of minimalism. Moreover, it reaps rich benefits like:

● Getting the important things done

Being a doer or a procrastinator all begins with the desire to achieve something. When we focus on less things, it is obvious that we would be able to accomplish all the important things that need to get done immediately.

● Uncomplicate anything

With less things to think about, we tend to worry less and perhaps become the most productive. Discover the power of simplicity with minimalist living from Minimalix. Apply it to all parts of life. Possessing less leads to managing less which in turn makes you worry less.

● Time and money saver

Free-up time from your already busy schedule by focusing on just the important things and spending less time on non-essential, unimportant things. Learn to do the right thing at the right time which could cut your time and money exponentially.

● Healthy mind, body and soul

De-stress with a culture that promotes healthy living with community and welfare to all. Stay connected and never be lonely. Our brain remains stimulated by talking to people we know and thus creates a healthy balance of mind, body and soul with the wisdom of minimalism. Minimalism does not promote “eager for more” but “less is more”. It lets you cut down those unhealthy things in life that you can never imagine.

● Target oriented

You may now think minimalism kills your desire to achieve because it asks to be satisfied with what you have. However, it is not true. Every human comes on the planet to serve a purpose and if he does not perform that, he is not going to be happy. Minimalism lets you focus on this exact purpose you are interested to meet and avoid all the unnecessary distractions on the journey of happiness.

● Fuel relationships

You possess less, you worry less, then all you think about is being good at what you do. This is a sure shot way to success. When your work-front is balanced, your relationships with people that matter to you the most are going to remain sorted and in times of adversities like coronavirus pandemic, they are the only one to remain at your shoulders all the time.

● Great memories

No stress, more happiness leads to creating memories for a lifetime. It is not money or assets that make you happy. Finally, it is the experience that counts. Minimalism is the way to go for generating enthusiastic memories that teach wisdom and gift your next generations happiness.

and many more.....

Contemporary and modern interior design themes often get confused. The key is to remember that “modern” refers to a particular era (most often the early and mid 20th century) whereas contemporary refers to designs of today; the here and now.

This is the interior design style for those who love to follow fashion trends and change with the times. Right now in the world of contemporary art and design we are loving the simplicity of whites, greys and blondes with the excitement of occasional color.

CONTEMPORARY

Contemporary
Bedroom

This one takes a similar approach with a textural accent wall and an emphasis on natural wood. The sculptural lighting adds a subtle artistic element to the design

While black and white themes sometimes feel too rigid, greyscale is often easier on the eye. Eliminating bright colors might seem like an easy approach to minimalism but coordinating color temperature often presents a challenge.

Contemporary Bedroom

Minimalist hues can add the illusion of space. These light greys, whites and woods are framed by lines between wall cabinets, ceiling contours and wooden floor paneling. Black joins the party in a flat screen TV and sliding door frames, as an Eames Bird replica keeps watch.

Create more room by hollowing out furniture. This minimalist living room does it well, with lifted sofas and cabinets, a white ringed chandelier, and an opposing mirror reflecting the view. Muted coloring allows space for potted greenery.

Contemporary Living Room

Contemporary minimalist bathrooms have high visual impact despite their lack of accessories. The cube shape of this WC and basin is unexpected and unique.

Contemporary Bathroom

Smooth paneling with wood grain running in opposite directions adds understated interest

This dark kitchen appears to contrast with the rest of the house, going from black to white rather abruptly.

And going even smaller is this narrow minimalist kitchen that no doubt sits somewhere close to a city center.

Contemporary Kitchen

Minimalist dining rooms can use creative elements like a chalkboard wall to bring in simple, colorful bursts of personality

Dark grey is less popular than stark white in minimalist designs, but its a bit gentler than black for a bit of contrast

Contemporary Dining room

If you fancy something more carefree, Boho interior design is your friend. Purposefully messy, this style— with its global inspirations, travel mementos and op shop finds— provides a warm ambience.

It combines different textures and materials from natural to metallic and embraces warm red and purples tones and plenty of layering when it comes to pillows, rugs and blankets. Beaded embellishments, tassels and crochet curtains are all whimsical additions to the Boho interior decor style.

BOHEMIAN

Bohemian Bedroom

Bohemian
Living room

Bohemian
Bathroom

Bohemian
Kitchen

Open shelving, mixed patterns and textures, or a touch of vintage in accessories or appliances are the key ingredients for a bohemian kitchen.

Bohemian atmosphere are relaxed yet chic and foster an inviting atmosphere where guests want to linger.

Bohemian
Dining room

While it often seems modern and funky to the eye, industrial design is actually quite rustic and sensible. It takes advantage of exposed steel, timber and brick to create an edgy living space that's full of character.

It preserves the best quality design of the turn of the 20th century and brings out all its raw beauty and mercurial appeal. Industrial interior design themes offer a unisex vibe that suits larger spaces, both at home or the office.

INDUSTRIAL

Here, industrial influence is a driving factor behind the perceived sense of minimalism. As an aside, textured grey paint is a great alternative to concrete for those who aren't ready to make the commitment.

Industrial
Bedroom

Industrial decor is quickly relinquishing its monopoly of this versatile material to include chic minimalist interiors too. This bedroom combines urban and natural influences with ease.

Industrial
Living Room

Industrial
Kitchen

Inspired by classic cement floors, the pattern and colours have been meticulously designed. Foreground and background merge perfectly thanks to a range of greys, making it a versatile color that adapts to any application.

Minimalist industrial bathroom with cement screed walls and suspended vanity ledge

Industrial
Bathroom

A dark industrial dining room can still be minimalist.

Industrial
Dining room

While mid century modern is considered a more practical interior design style, there's more to it than pure function. It may not be fussy, but it still oozes character with nostalgic elements gleamed from the 1950s and 60s.

Everything is scaled back and simple, but with some fun retro stylings thrown in.

MID CENTURY MODERN

Mid Century
Modern
Bedroom

With little details like an elegant fireplace, a sparkling kitchen, gourmet coffee and two luxurious bathrooms, this 1963 A-Frame is the perfect place to get away.

A combination of vintage American mid century furniture was matched with modern pieces, in a clean layout that strikes a harmonious chord. The mid century modern living room uses wood and tan furniture to create a warm welcome within an all white room.

Mid Century Modern Living room

Mid Century Modern Kitchen

There are plenty of adorable Mid Century details— check out all those chairs! And this cabin comes with plenty of things to do too: there are canoes available to paddle the day away in and a hammock ready for the nap you'll need afterwards.

This simple bathroom feels energizing— the perfect place to spend the first few minutes of your day. Courtesy of Amber Interiors.

Mid Century Modern Bathroom

By using just a little bit of decoration, the unique light fixture of this dining room really stands out

Mid Century Modern Dining Room

Inspired by the simplicity of Nordic life, Scandinavian design has become an artform in itself. It takes to crafting something stylish and cutting edge to functional and simple.

To that end, white and blonde color palettes are typical of Scandi with splashes of elements from nature such as furs, leathers and natural fibers.

SCANDINAVIAN

Scandinavian
Bedroom

Simple color palette, simple and clean lines with neutral structure and natural elements

Try something more Scandinavian. A light wooden floor, muted seating and tables afford visual space for hipster monochrome prints and some jazzy lime cushions.

Scandinavian Living Room

Some, but not all, Scandinavian style kitchens also have elements of minimalism like this one

Scandinavian Kitchen

A minimalist rain shower by Hansgrohe. The room features a full-fledged set of sanitary porcelain: a toilet bowl, a bidet by Villeroy & Boch Joyce and a big wash basin with a Hansgrohe Puravida mixer.

Scandinavian Bathroom

Rustic design is all about bringing the outdoors in, but without the biting bugs and the risks of inclement weather.

Think raw, reclaimed timbers, exposed beams and unfinished stones, popular with a lot of hipster cafes and restaurants of today. There's no reason why you can't recreate this interior design style at home.
