KOOL SHIELD®

is a cost-effective answer to
logistical temperature control.

- ✓ Protect your load from spoilage and excessive heat during wait time for unloading at your destination.
- ✓ Reduce fuel consumption and refrigeration run-time.
- ✓ Diminish damage from humidity on packaging.

KOOL SHIELD®

is available in a configuration to
meet your needs:

- ✓ Electric or Manual lift and return
- ✓ Rear Door, Swing or Roll up
- ✓ Side Door

What Customers Say:

"Kool Shield is now standard equipment for our fleet. We've had it since Oct. 2015 and its done everything we asked it to do. It makes us compliant for chain of custody. Now that we are getting qualified in the Safe Quality Foods Program, Kool Shield is part of our success.

*We used to struggle to keep temps.
Not anymore with Kool Shield!
Cost of ownership is a mere \$6 a week.*

Ted Brozanski, President
Stokes Fish & Lake Trucking

"I started out buying 3 Kool Shields's and am happy with them. We are going to outfit our entire fleet. We haul plants and foliage and we haul ice cream. When its 90 degree's outside and we have to maintain -15 with the doors open, I couldn't do it without Kool Shield.

Kool Shield helps us in our LTL, multi-drop operations to maintain temperatures, and save fuel. Our drivers absolutely love the Kool Shield."

Seth Keck, Owner - JT Carriers

"I got Kool Shield to protect mushrooms that I haul. They are like little sponges that take on temperature and moisture very quickly. I saved 30% on reefer fuel. I'm a proud owner of Kool Shield and I would tell any other owner/operator to invest."

Dave Hendry, Owner/Operator
Cannonball Express
