

ABOUT US

EP OEM Parts is located in Hangzhou, the capital of China's Zhejiang province. EP OEM Parts is headquartered in Hangzhou and has branches in the United States, Japan, and Europe. Our specialization is the production and assembly of mechanical parts in ferrous and non-ferrous materials, which can be used in numerous industrial sectors.

In addition to our own factories in Anji, Jiangjiang, Tongxiang and Wisconsin, we also work with a professional network of motivated suppliers and manufacturers. This puts us in a position to offer you a positive solution, to each of your technical needs.

Founded in 1996, EP Equipment became China's largest manufacturer of material handling equipment with 1600+ employees. We offer manufacturing, design, sourcing, and quality control for all components used on material handling, transportation, machinery, medical devices, pumps, and many other industrial fields. Our business has grown rapidly, and EP OEM Parts has become a trusted partner, to many of the world's largest companies.

We can produce according to your own drawings, specifications, and designs. In case you have no drawings available, our team of designers can work with you, based on your samples.

We offer you a customized solution for all of your needs, which results in a substantial decrease in your incurred cost structure, as it relates to purchasing, administration and warehousing.

Our many years of experience in the field of organizing, sourcing and producing in China, has put us in a strong position to serve each customer with competitive pricing, excellent service and quality products in accordance with international standards.
