

EP
TRAILER PART

COMPANY INTRODUCTION

EP OEM is located in Hangzhou, capital of China's Zhejiang province. EP OEM is headquartered in Hangzhou and has branches in the United States, Japan and Europe. Our specialization is the production and assembly of mechanical parts in ferrous and non-ferrous materials which can be used in numerous industrial sectors.

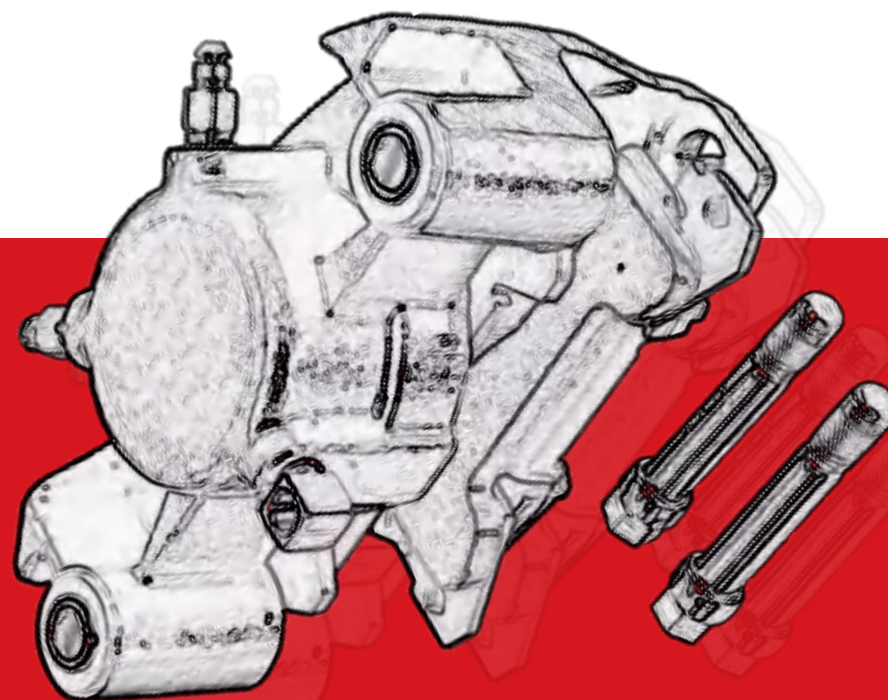

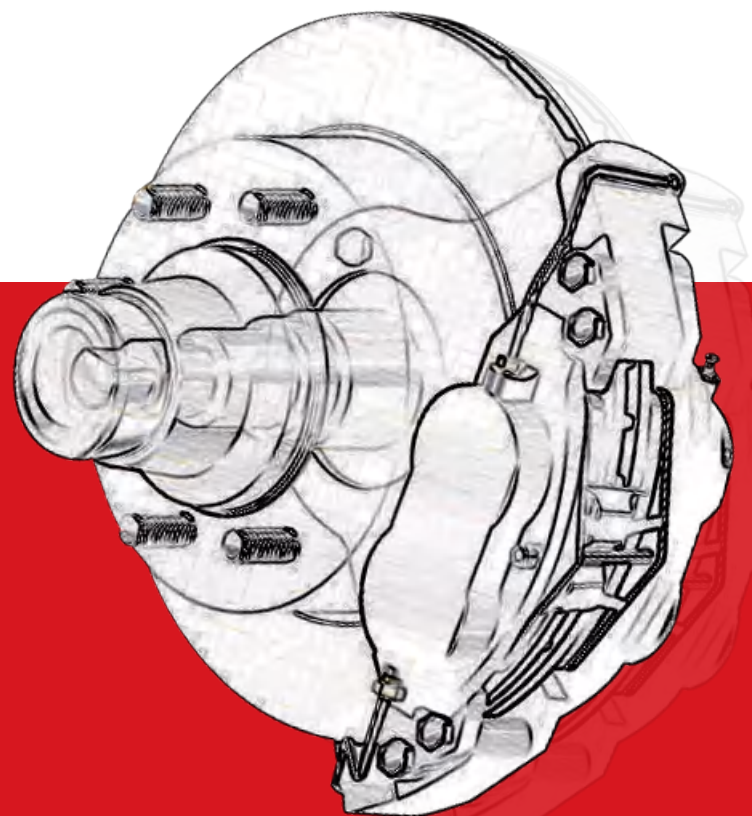

In addition to our own factories in Anji, Jingjiang, Ningbo and Wisconsin we also work with a professional network of motivated suppliers. It brings us in a position to offer you a positive answer to each of your technical needs.

Founded in 1996, EP became China's largest manufacturer of material handling equipment with 1600+ employees. We offer manufacturing, design, sourcing and quality control for the components used on material handling, transportation, machinery, medical devices, pumps and many other industry fields. The business grew rapidly and EP OEM became a trusted partner to many of the world's largest companies.

Our Trailer part plant is located at Ningbo, Zhejiang, China established in 2002. Our products cover Spindle, Torsion arm, Caliper Yoke, Adjusting screw. We mainly serve for Dexter Axle for 14 years.

We will consistently deliver the best service and products to our customers with our effort and desire.
