Company Overview

ResilientTech Advisors is a boutique cybersecurity and technology risk consultancy focused on helping organizations in highly regulated sectors secure operations, reduce risk, and modernize with confidence.

Differentiators

- We specialize in translating complex challenges into executable strategies, clear governance, and measurable outcomes, and **we stay engaged to help drive those outcomes** across planning and delivery.
- Our services are rooted in real-world experience supporting public sector leadership, delivering cross-agency coordination, and advising executive teams through moments of transformation. We don't just highlight risks or misalignments — **we enable resolution and results**.

Core Competencies

- Cybersecurity & Technology Risk Advisory
- Program & Delivery Leadership
- Governance, Risk & Compliance (GRC)
- AI & Emerging Tech Governance
- Capability Development & Advisory Staffing
- Business Acumen Training for Cyber Teams
- Executive Coaching & Communication for Cyber Leaders

Past Performance

- Serving as Deputy CISO for Finance under subcontract, leading the design and coordination of a cybersecurity risk reduction strategy and execution plan across multiple "crown jewel" Virginia state agencies.
- Coaching cybersecurity professionals to develop leadership and business acumen - guiding transitions to executive roles and aligning cybersecurity practices with organizational priorities.
- Leadership and advisory roles at McKinsey & Company and Deloitte for US Intelligence Community (USIC) organizations, US Department of the Treasury, the Federal Emergency Management Agency (FEMA), pharmaceutical companies, state governments, and healthcare organizations.
- Cybersecurity and risk program development and management for National security and federal law enforcement organizations.
- Led the implementation of AI-enabled cybersecurity tooling as CISO of a federal employee health plan, integrating emerging technology into the security program with a focus on risk governance, operational readiness, and executive accountability.
- Built and delivered a cyber career development initiative reaching 500+ professionals, providing strategic coaching and guidance that helped clients reposition for advancement, leadership, and industry transitions, with an emphasis on connecting cybersecurity expertise to organizational priorities and business outcomes.
