Clarity over jargon.
Substance over spin.
Integrity, always.

Company Overview

ResilientTech Advisors is a boutique cybersecurity and technology risk firm that helps public and private sector organizations strengthen resilience, navigate disruption, and modernize with confidence. We bridge strategy and execution to deliver secure outcomes in complex, high-stakes environments.

Differentiators

- We specialize in **translating complex challenges into executable strategies with clear governance and measurable outcomes**, and we stay engaged to help drive those outcomes across planning and delivery.
- Our services are rooted in real-world experience supporting public and private sector leadership, delivering cross-agency coordination, and advising executive teams through moments of transformation with discretion in politically charged environments. We don't just highlight risks or misalignments - **we enable resolution and results**.

Core Competencies

- Cybersecurity & Technology Risk Advisory
- Embedded Cybersecurity Leadership
- Smart AI Adoption
- Program Management & Delivery
- Governance, Risk & Compliance (GRC)
- Capability Development
- Business Acumen Training for Cyber Teams
- Coaching & Communication for Cyber Leaders

Past Performance

- Currently serving as Deputy CISO for Finance for the Commonwealth of Virginia, with VITA, under subcontract: Designed and executed the enterprise cybersecurity risk reduction strategy across \$87.5B in public-sector operations, driving measurable reduction of 11 critical risks and embedding sustainable security practices ahead of the administration transition.

Previous Experience & Impact

- Led the rebuild of security and risk functions for critical infrastructure entities, closing capability gaps and restoring executive trust after multiple privacy incidents.
- Integrated AI-enabled security operations and governance as CISO for a federal employee health plan, achieving a 37% reduction in incident response time and aligning security strategy with a \$33M budget and 143 personnel.
- Guided national security, financial, and healthcare clients, including USIC, Treasury, and FEMA, through cloud migrations and cybersecurity transformation, strengthening regulatory posture and mission alignment.
- Accelerated cybersecurity career mobility for mid- to senior-level professionals by coaching them to connect technical value to business outcomes, resulting in executive-level placements across public and private sectors.
- Launched a scalable career development initiative that equipped 500+ cybersecurity professionals to lead, influence, and grow in high-stakes environments.
